== Overview == Dore, previously known as DDAT (Dyslexia Dyspraxia Attention Treatment), was initiated by businessman Wynford Dore for his daughter Susie who was diagnosed as severely dyslexic and became depressed and suicidal. After being told that there was no cure for dyslexia, Wynford began working with a team of researchers to investigate Harold Levinson's claim that the cerebellum is linked to the types of symptoms Susie was experiencing. Roy Rutherford, a friend of Wynford's, suggested that an underdeveloped cerebellum may be the cause of Susie's symptoms. The Dore programme was subsequently developed for Susie and, after she began to read and write, then made available to others.

The programme engaged 700 researchers in some 70 major projects. Thematic work across the diverse range of projects enabled analysis of themes and the identification of 'ten principles for effective teaching and learning'. studies a broad range of learning outcomes. It was initiated in 2000, ended in 2011 and was managed on behalf of the Higher Education Funding Councils by the Economic and Social Research Council

A flurry of studies in the 1970s, often labelled the "good language learner studies", sought to identify the distinctive factors characteristic of successful learners. Although those studies are now widely regarded as simplistic, they did serve to identify a number of factors affecting language acquisition. More detailed research on many of these specific factors continues today. For this reason, individual variation in second-language acquisition is not generally considered a single area of research. Rather, it is simply a convenient way to categorize studies about language... == Background == It is used by many schools internationally, and has been available since 1994. It was updated in 2014 and called MYP: New Chapter. Teaching practices in Focal Skills programs are heavily influenced by the work of Stephen Krashen. There is an emphasis on comprehensible input using authentic materials. Activities that would raise a student's affective filter are generally avoided. The Focal Skills Movie Technique is an example of the kind of teaching used in this approach. == Teaching and... == Background == Summary ==

Individual variation in second-language acquisition Unlike children who acquire a language, adults learning a second language rarely reach the same level of competence as native speakers of that language. Unlike children who acquire Individual variation in second-language acquisition is the study of why some people learn a second language better than others. Some may stop studying a language before they have fully internalized it, and others may stop improving despite living in a foreign country for many years. There have been many studies that have attempted to explain these phenomena. Individual variation in second-language acquisition is the study of why some people learn a second language better than others. It also appears that children are more likely than adults to reach native-like competence in a second language a3e2e22d6c
