

How Many Deaths In The 2004 Tsunami

Additionally, further death toll continued to rise as the threat of infectious diseases broke out soon after with confirmed first cases of cholera following the disaster. The areas hardest hit were the northern coastal regions and outlying islands, such as Penang and Langkawi. Wave heights near the shore were 2.5–3 m (8.2–9.8 ft) for Langkawi and 2–3 m (6.6–9.8 ft) for Penang, where wave runup heights reached 6–8 m (20–26 ft) in one location. In some areas of Malaysia, the tsunami surged 3 km (1.9 mi) inland. Houses in fishing villages along coastal areas, such as Batu Ferringhi and Balik Pulau in Penang, were damaged. Coastal areas in Peninsular Malaysia, including 13 villages in Kuala Muda, Kedah, and Kuala Triang in Langkawi island, were also affected. About a quarter of holiday vessels anchored in Rebak and Telaga harbours in Langkawi were damaged. The waves sent parked motorcycles crashing and left cars covered with mud along stretches of Gurney Drive in George Town, Penang...

Tsunami Unlike normal ocean waves, which are generated by wind, or tides, which are in turn generated by the gravitational pull of the Moon and the Sun, a tsunami is generated by the displacement of water from a large event. Earthquakes, volcanic eruptions, underwater explosions, landslides, glacier calvings, meteorite impacts and other disturbances above or below water all have the potential to generate a tsunami. 'harbour wave'; pronounced [tsunami]) is a series of waves in a water A tsunami ((t)soo-NAH-mee, (t)suu-; from Japanese: 津波, lit. 'harbour wave', pronounced [tsunami]) is a series of waves in a water body caused by the displacement of a large volume of water, generally in an ocean or a large lake. A tsunami (/ (t)su:'nɑ:mi, (t)su'-'/ (t)soo-NAH-mee, (t)suu-; from Japanese: 津波, lit 9a3874adb4

2004 Indian Ocean earthquake and tsunami 2000s portal Deaths in December 2004 - notable people killed in the 2004 Indian Ocean tsunami List of earthquakes in 2004 List of earthquakes in Indonesia On 26 December 2004, at 07:58:53 local time (UTC+7), a Mw 9. 2-9. 3 earthquake struck with its epicenter off the west coast of Aceh, in northern Sumatra, Indonesia. The undersea megathrust earthquake, known in the scientific community as the Sumatra-Andaman earthquake, was caused by a rupture along the fault boundary between the Burma plate and the Indian plate, and reached a maximum Mercalli intensity of IX in some areas 9a3874adb4

The earthquake was the most powerful ever recorded in Japan, and the fourth most powerful recorded in the world since modern seismography began in 1900. It triggered powerful tsunami waves that may have reached heights of up to 40.5 m (133 ft) in Miyako in Tōhoku's Iwate Prefecture, and which, in the Sendai area, traveled at 700 km/h (435 mph) and up to 10 km (6 mi) inland. Residents of Sendai had only eight to ten minutes of warning, and more than a hundred evacuation sites were washed away. The snowfall which accompanied the tsunami and the freezing temperature hindered rescue works; for instance, in Ishinomaki, the city with the most deaths, the temperature was 0 °C (32 °F) as the tsunami hit. Official figures released... 9a3874adb4 == Tsunami == 9a3874adb4

Effect of the 2004 Indian Ocean earthquake on Sri Lanka Following the event, one and a half million people were displaced from their homes. On 3 January 2005, Sri Lankan emergency authorities had reported 30,000+ confirmed deaths. The Sri Lanka 2004 disaster was one of the cataclysmic events that took place in the Indian sub-continent countries struck by a tsunami resulting from The Sri Lanka 2004 disaster was one of the cataclysmic events that took place in the Indian sub-continent countries struck by a tsunami resulting from the Indian Ocean earthquake on 26 December 2004 9a3874adb4

== Biography == 9a3874adb4 The tsunami was caused by a 9.0 magnitude earthquake located in Indonesia in the early morning of 26 December 2004. The first location where the tsunami was noticed was on the Similan Islands, a famous diving site located about 70 km from Phang Nga town in Pha Nga province, 13 km from central Khao Lak. When the tsunami struck, the sea around these islands was reported to have strong currents... 9a3874adb4 Lack of warnings on the arrival of the tsunami, coinciding with the Christmas and New Year holiday season in the nation and the tsunami occurring at nighttime, contributed to the large loss of life. With 426 deaths, the tsunami was the deadliest volcanic tsunami in Indonesia since the 1883 Krakatoa tsunami, which originated from the same island. 9a3874adb4 == Countries suffering major casualties and damage == 9a3874adb4

2011 Tōhoku earthquake and tsunami 1 undersea megathrust earthquake occurred in the Pacific Ocean, 72 km (45 mi) east of the Oshika Peninsula of the Tōhoku region of Japan. It lasted approximately six minutes and caused a tsunami. Official figures released in 2021 reported 19,759 deaths, 6,242 injured, On 11 March 2011, at 14:46:24 JST (05:46:24 UTC), a Mw 9. It is often referred to by its numerical date, 3. city with the most deaths, the temperature was 0 °C (32 °F) as the tsunami hit. 0-9. It is sometimes known in Japan as the "Great East Japan Earthquake" (東日本大震災, Higashi

Nihon Daishinsai), among other names. 11 (read San ten Ichi-ichi in Japanese) 9a3874adb4

Tsunami waves do not resemble normal undersea currents or sea waves because their wavelength is far longer. Rather than appearing as a breaking wave, a tsunami may instead initially resemble a rapidly rising tide. For this reason, it is often referred to as a tidal wave, although this usage is not favoured by the scientific community because it might give the false impression of a causal relationship between tides and tsunamis. Tsunamis generally consist of a series of waves, with periods ranging from minutes to hours, arriving in a so-called "wave train... 9a3874adb4 The earthquake caused a massive tsunami with waves up to 30 m (100 ft) high, referred to by British and Commonwealth media as the Boxing Day tsunami, after the Boxing Day holiday, or the Asian tsunami, which devastated communities along the surrounding coasts of the Indian Ocean, killing an estimated 227,898 people in 14 countries, especially in Aceh in Indonesia, Sri Lanka, Tamil Nadu in India, and Khao Lak in Thailand. The direct result was severe disruption to living conditions and commerce in coastal provinces of these and other surrounding countries. It is the deadliest tsunami in history, the deadliest natural disaster of the 21st century, and one of the deadliest natural disasters in recorded history. It is also the worst natural disaster in the history of Indonesia... 9a3874adb4 Asian expatriates, governments, humanitarian organisations and individuals around the world arrived, eager to offer aid and technical support. The global scale of the disaster led to three rapid activations of the International Charter on Space and Major Disasters: by the French Civil Protection Agency for Sri Lanka, by the Indian space agency ISRO the Maldives, for India, particularly the Andaman and Nicobar Islands in the southeast, and by the United Nations Office for Outer Space Affairs (UNOOSA), acting on behalf of the United Nations Office for Project Services (UNOPS), for... 9a3874adb4
