Powders are a special sub-class of granular materials, although the terms powder and granular are sometimes used to distinguish separate classes of material. In particular, powders refer to those granular materials that have the finer grain sizes, and that therefore have a greater tendency to form clumps when flowing 6f168654db

The dreamer sits at the bedside of a woman who says she is dying. Because of the warm color in her lips and cheeks, he questions, several times, if she truly is dying. After confirming that she must indeed die, the woman asks a favor. After she dies, he should dig her grave with a large shell, mark it with a fragment of fallen star, and wait at its side a hundred years for her return. The dreamer prepares her grave and buries her as requested. Then he begins his vigil, losing count of the days as years go by. As he begins to wonder if she didn't deceive him, a slender stem emerges and a white lily
