Like predation, parasitism is a type of consumer-resource interaction, but unlike predators, parasites, with the exception of parasitoids, are much smaller than their hosts, do not kill them, and often live in or on their hosts for an extended period. Parasites... 9d12395bd6 There are six major parasitic strategies of exploitation of animal hosts, namely parasitic castration, directly transmitted parasitism (by contact), trophically-transmitted parasitism (by being eaten), vector-transmitted parasitism, parasitoidism, and micropredation. One major axis of classification concerns invasiveness: an endoparasite lives inside the host's body; an ectoparasite lives outside, on the

host's surface. Numerous stories about John and other apostles began circulating in the 2nd century AD. These stories trace to a variety of different authors and contexts, and were revised and retold in many different forms and languages over the centuries. Sometimes episodes that had originally circulated independently were combined with other stories to form collections about an apostle, and sometimes episodes that had originally been part of multi-episode collections were detached and circulated independently. Most extant manuscripts of such stories also date to a period considerably after they first began circulating.
