

Who And When Invented Computer

Did You Know

The story of coding and computers

2nd Generation of Computing - Afterwards we'll discuss, the 2nd generation of modern computing, the transistor era. The transistor miniaturized the vacuum tube and was much more efficient in terms of speed, power consumption, heat and more. It is the core technology behind how all computers operate today.

Origins of Computing - Starting off we'll look at, the origins of computing from as far back as 3000 BC with the abacus and progressing to discuss some of the first mechanical computers. After this, we'll get to see the first signs of modern computing emerge, through the use of electromechanical relays
