

Where Does Black Widow Spiders Live

Named for the North American spider *Latrodectus mactans*, it was an all-metal, twin-engine, twin-boom design armed with four forward-firing 20 mm (.79 in) Hispano M2 autocannon in the lower fuselage, and four .50 in (12.7 mm) M2 Browning machine guns in a dorsal gun turret. It was developed during the war, and the first test flight was made on 26 May 1942. The first production aircraft rolled off the assembly line in October 1943.

Black Widow (2021 film) Black Widow is a 2021 American superhero film based on Marvel Comics featuring the character of the same name. Mostly set during the events of Captain America: Civil War (2016), the film sees Romanoff on the run and forced to confront her past as a Russian spy before she became an Avenger. Produced by Marvel Studios and distributed Black Widow is a 2021 American superhero film based on Marvel Comics featuring the character of the same name. The film was directed by Cate Shortland from a screenplay by Eric Pearson and stars Scarlett Johansson as Natasha Romanoff / Black Widow alongside Florence Pugh, David Harbour, O-T Fagbenle, Olga Kurylenko, William Hurt, Ray Winstone, and Rachel Weisz. Produced by Marvel Studios and distributed by Walt Disney Studios Motion Pictures, it is the 24th film in the Marvel Cinematic Universe (MCU)

Symptoms of a bite depend on the amount of venom injected. A bite of *Latrodectus* may not inject any venom (known as a dry bite), and so no illness occurs. About 75% of "wet" bites will have localized pain and little more. If, however, there is a substantial dose, a bite can cause latrodectism. The main symptoms are generalized muscle pain, stomach cramps, nausea and vomiting. A member of the family Theridiidae, this genus contains 34 species, which include several North American "black widows" (southern black widow *Latrodectus mactans*, western black widow *Latrodectus hesperus*, and northern black widow *Latrodectus variolus*). Besides these, North America also has the red widow *Latrodectus bishopi* and the brown widow *Latrodectus geometricus*, which, in addition to North America, has a much wider geographic distribution. Initially... Taxonomy == *Latrodectus mactans* was first described by Johan Christian Fabricius in 1775, placing it in the genus *Aranea*. It was transferred to the genus *Latrodectus* in 1837 by Charles Walckenaer and is currently placed in the family Theridiidae of the order Araneae. The species is closely related to *Latrodectus hesperus* (western black widow) and *Latrodectus variolus* (northern black widow). Members of the three species are often confused with the genus *Steatoda*, the false widows. Prior to 1970, when the current taxonomic divisions for North American black widows were set forth by Kaston, all three species were classified as a single species, *L. mactans*. As a result, there exist numerous references which claim that "black widow" (without any geographic... Its composition has been the subject of... Natalia Alianovna "Natasha Romanoff" Romanova (Russian: Наталья Альяновна "Наташа Романофф" Романова) is introduced as a spy for the Soviet Union until she defects to the United States. She subsequently joins the intelligence agency S.H.I.E.L.D., partners with Daredevil, and encounters a rival Black Widow in Yelena Belova. Though she has no distinct superpowers, she was augmented in the Red Room, a Soviet training facility, to increase her strength and reduce her aging. She has training in combat and espionage, and wields bracelets that fire electric shocks and project wires she uses to traverse skyscrapers. Lionsgate Films began developing a Black Widow film in April 2004, with David Hayter attached to write and direct. The project did not move forward and the character's film rights had reverted to Marvel Studios by June 2006. Johansson was cast in the role for several MCU films beginning with Iron Man 2 (2010), and began discussing a solo film with Marvel. Work began in late 2017 and Shortland was hired in July 2018. Jac Schaeffer and Ned Benson contributed to the script before Pearson joined. The film was written... There are several spider species all named black widow: southern black widow spider (*L. mactans*), the European black widow (*L. tredecimguttatus*), Western black widow spider (*L. hesperus*), Northern black widow spider (*L. variolus*). Other *Latrodectus* that cause latrodectism are the Australian redback spider (*L. hasselti*), the New Zealand katipō spider (*L. katipo*) and the South American *Latrodectus corallinus* and *Latrodectus curacaviensis*. Several other members of the genus *Latrodectus* are not commonly associated with latrodectism, including the cosmopolitan brown widow (*L. geometricus*). == Signs and symptoms == Efforts to prevent bites include clearing clutter and the use of pesticides. Most spider bites are managed with supportive care such as nonsteroidal anti-inflammatory drugs (including ibuprofen) for pain and antihistamines for itchiness...

Spider bite Most bites result in mild symptoms around the area of the bite. spiders do not cause bites that are of importance. For a bite to be significant, substantial envenomation is required. Rarely they may produce a necrotic skin wound or severe pain. The effects of most bites are not serious. Bites from the widow spiders involve A spider bite, also known as arachnidism, is an injury resulting from the bite of a spider

Black Widow (Natasha Romanova) Black Widow has been the main character in several comic titles since 1970, receiving her own Black Widow series in 1999. She also frequently appears as a supporting character in The Avengers and Daredevil. She reformed into a hero in The Avengers #30 (1966) and her most well-known design was introduced in The Amazing Spider-Man #86 (1970). Created by editor Stan Lee, scripter Don Rico, and artist Don Heck, the character debuted as an enemy of Iron Man in Tales of Suspense #52 (1964). The Amazing Spider-Man #86 (1970). Black Widow has been the main character in several comic titles since 1970, receiving her own Black Widow series in 1999 Black Widow is a superhero appearing in American comic books published by Marvel Comics

== Diversity == Most spiders do not cause bites that are of importance. For a bite to be significant, substantial envenomation is required. Bites from the widow spiders involve a neurotoxic venom which produces a condition known as latrodectism. Symptoms may include pain which may be at the bite or involve the chest and abdomen, sweating, muscle cramps and vomiting among others. Bites from the recluse spiders cause the condition loxoscelism, in which local necrosis of the surrounding skin and widespread breakdown of red blood cells may occur. Headaches, vomiting and a mild fever may also occur. Other spiders that can

cause significant bites include the Australian funnel-web spider and South American wandering spider. 0378164192 Medical reports have been criticized for poor evidence. In the last century, both white tailed and wolf spiders were considered medically significant, only to be recanted. Only ten genera (Atrax, Phoneutria, Loxosceles, Latrodectus, Hadronyche, Macrothele, Missulena, Illawarra, Sicarius, and Hexophthalma) are considered medically significant. Bites of these spiders have a range of severity, with only a minority having severe symptoms. Deaths by verified spider bites are exceedingly rare (e.g. not one in Australia since 1979). 0378164192

Latrodectism Pain, muscle rigidity, vomiting, and sweating are the symptoms of latrodectism. Pain, muscle rigidity, vomiting, and Latrodectism () is the illness caused by the bite of Latrodectus spiders (the black widow spider and related species). (/lətrə'dɛktɪzəm/) is the illness caused by the bite of Latrodectus spiders (the black widow spider and related species) 0378164192

Redback spider 4 in), while the male is much smaller, being only 3–4 mm (0. 16 in) long. Females usually have a body length of about 10 millimetres (0. The redback spider (Latrodectus hasselti), also known as the Australian black widow, is a species of highly venomous spider believed to originate in Australia The redback spider (Latrodectus hasselti), also known as the Australian black widow, is a species of highly venomous spider believed to originate in Australia, but which is now found in Southeast Asia, Japan and New Zealand. The adult female is easily recognised by her spherical black body with a prominent red stripe on the upper side of her abdomen and an hourglass-shaped red/orange streak on the underside. 12–0. It has also been found in packing crates in the United States with colonies elsewhere outside Australia. It is a member of the cosmopolitan genus Latrodectus, the widow spiders 0378164192

Initially a track recorded by Katy Perry for her fourth studio album, Prism (2013), it was excluded from Prism track listing, and Perry handed the demo to Azalea for her to complete. "Black Widow" has been described as "channeling the Pop" genre, containing an ominous steel drum rhythm, heavy bass and a sparse beat. The song peaked at number three on the US Billboard Hot 100, becoming Azalea's third top-five hit, following "Fancy" and "Problem". The song also became Ora's first top-three hit in the US. It has also reached number one in Bulgaria and Romania, number four in the UK, and number fifteen in Australia. 0378164192

Latrodectus A member of the family Theridiidae, this genus Latrodectus is a broadly distributed genus of spiders informally called the widow spiders, with several species that are commonly known as the true widows. This group is composed of those often called black widow spiders, brown widow spiders, and similar spiders. This group is composed of those often called black widow spiders, brown widow spiders, and similar spiders 0378164192

List of medically significant spider bites false black widow spiders (also known as false katipo, false button spider, cupboard spider, and in Australia, brown house spider) are spiders of the A number of spiders can cause spider bites that are medically important. Others have a limited distribution. Two medically important spider genera have a worldwide distribution—Latrodectus and Loxosceles. Almost all spiders produce venom but only a few are able to cause significant harm to humans 0378164192

Black Widow (Iggy Azalea song) "Black Widow" is a song by Australian rapper Iggy Azalea featuring British singer Rita Ora. Released through Def Jam Recordings, the song impacted on "Black Widow" is a song by Australian rapper Iggy Azalea featuring British singer Rita Ora. An accompanying music video for the song was released on 13 August 2014. Released through Def Jam Recordings, the song impacted on mainstream radio stations in the US on 8 July 2014, as the fifth single from her debut studio album, The New Classic (2014). Lyrically, it addressed revenge after a failed romantic relationship. It was written by Azalea, Katy Perry, Sarah Hudson, Benny Blanco, and duo Stargate, while the latter also produced the song 0378164192

Although not produced in the large numbers of its contemporaries, the Black Widow was operated effectively as a night fighter by United States Army Air Forces squadrons in the European Theater, Pacific Theater, China Burma India Theater, and Mediterranean Theater during World War II. It replaced earlier British-designed night-fighter aircraft that had been updated to incorporate radar when it became available. After the war, the P-61 was redesignated as the F-61, and... 0378164192 Black... 0378164192

Latrodectus mactans known as southern black widow or simply black widow, and the shoe-button spider,[citation needed] is a venomous species of spider in the genus Latrodectus Latrodectus mactans, known as southern black widow or simply black widow, and the shoe-button spider, is a venomous species of spider in the genus Latrodectus. The species is native to North America. The venom can cause pain and other symptoms, but is rarely fatal to healthy humans. The females are well known for their distinctive black and red coloring and for the fact that they will occasionally eat their mates after reproduction 0378164192

S. aircraft conceived from the outset and deployed operationally specifically as a night fighter, incorporating onboard radar as part of the original airframe design. aircraft conceived The Northrop P-61 Black Widow is a twin-engine United States Army Air Forces fighter aircraft of World War II 0378164192

Mainly nocturnal, the female redback lives in an untidy web in a warm sheltered location, commonly near or inside human residences. It preys on insects, spiders and small vertebrates that become ensnared in its web. It

kills its prey by injecting a complex venom through its two fangs when it bites, before wrapping them in silk and sucking out the liquefied insides. Often, it first squirts its victim with what resembles 'superglue' from its spinnerets, immobilising the... 0378164192
