The Face upon the Barroom Floor I'm numb, I succumb When he renders the face on the barroom floor. The poem is mentioned as a screen test for Jeannie in the TV sitcom I Dream of Jeannie "The Face upon the Barroom Floor", aka "The Face upon the Floor" and "The Face on the Barroom Floor", is a poem written by Hugh Antoine d'Arcy in 1887 and first published in the New York Dispatch 8a54ff5ef9

The exact cause is unknown, but believed to involve loss of the myelin of the trigeminal nerve. This might occur due to nerve compression from a blood vessel as the nerve exits the brain stem, multiple sclerosis, stroke, or trauma. Less common causes include a tumor or arteriovenous malformation. It is a type of nerve pain. Diagnosis is typically based on the symptoms, after ruling out... 8a54ff5ef9 The lyrics were written by the bassist, Roger Waters, who recalled his experience of being injected with tranquilisers before a performance in 1977. The music was composed by the guitarist, David Gilmour. Waters sang lead vocals on the verses, and Gilmour, the chorus. The two argued during the recording, with Waters seeking an orchestral arrangement and Gilmour preferring a more stripped-down arrangement. They compromised by combining both versions. Gilmour said "Comfortably Numb" was the last time he and Waters were able to work together constructively. 8a54ff5ef9 The members of R.E.M. consider the recorded album representative of the band at their peak, and fans generally regard it as the band's last great record before a perceived artistic decline following Berry's departure. It has sold around seven million units, and has grown in cult status in the years after its release, with several retrospectives ranking it among the band's best work. 8a54ff5ef9 Face to Face produced three singles, including "You Raise Me Up," a cover of the 2001 Secret Garden song, which became Westlife's 13th number-one single in the UK and remains one of their best... 8a54ff5ef9 The record builds on ideas explored in Pink Floyd's earlier recordings and performances, while limiting the extended instrumentals that characterised the band's earlier work. The group employed multitrack recording, tape loops, and analogue synthesisers, including experimentation with the EMS VCS 3 and a Synthi A. The engineer Alan Parsons was responsible for many aspects of the recording, and for the recruitment of the

session singer Clare Torry, who appears on "The Great Gig in the Sky".

The album received mixed reviews from critics, who praised its polished, familiar pop style and some of its stronger original songs, but noted its heavy reliance on cover material. Despite this, Face to Face was a commercial success. It became Westlife's fifth non-consecutive number-one album in Ireland and their fourth in the United Kingdom, while also topping the charts in Australia and Scotland. The album achieved multi-platinum status in both Ireland and the UK and sold over one million copies across Europe. == Composition and recording ==

Trigeminal neuralgia It is a form of neuropathic pain. Groups of these episodes Trigeminal neuralgia (TN or TGN), also called Fothergill disease, tic douloureux, or trifacial neuralgia, is a long-term pain disorder that affects the trigeminal nerve, the nerve responsible for sensation in the face and motor functions such as biting and chewing. form results in episodes of severe, sudden, shock-like pain in one side of the face that lasts for seconds to a few minutes. There are two main types: typical and atypical trigeminal neuralgia

New Adventures in Hi-Fi was recorded during and after the band's 1995 tour in support of *Monster*. The material on the album mixed the acoustic country rock feel of *Out of Time* and *Automatic for the People* with the rock sound of *Monster* and *Lives Rich Pageant*. The band cited Neil Young's 1973 album *Time Fades Away...* The motor division of the trigeminal nerve derives from the basal plate of the embryonic pons, and the sensory division originates in the cranial neural crest. Sensory information from the face and body is processed by parallel pathways in the central nervous system.

== History == According to d'Arcy, the poem was inspired by an actual happening at Joe Smith's saloon at Fourth Avenue and 14th Street in Manhattan. When it was reprinted in a d'Arcy collection, he wrote a preface explaining the confusion of the two titles: Their first album, *Cynical*, was distributed by Edge Records. Their second album, *Scarred*, is a collection of unreleased demos and remixes also released by Edge Records, which they did not consult the band about, such as which songs the band intended to include on their Vagrant Records debut, *...And The Sadness Prevails*. No Motiv subsequently left Edge for unspecified reasons. The band signed to Vagrant...

Inferior alveolar nerve anaesthesia This procedure attempts to anaesthetise the inferior alveolar nerve prior to it entering the mandibular foramen on the medial surface of the mandibular ramus. These Inferior alveolar nerve block (abbreviated to IANB, and also termed inferior alveolar nerve anesthesia or inferior dental block) is a nerve block technique which induces anesthesia (numbness) in the areas of the mouth and face innervated by one of the inferior alveolar nerves which are paired on the left and right side. These areas are the skin and mucous membranes of the lower lip, the skin of the chin, the lower teeth and the labial gingiva of the anterior teeth, all unilaterally to the midline of the side on which the block is administered. The inferior alveolar nerve is a branch of the mandibular nerve, the third division of the trigeminal nerve. However, depending on technique, the long buccal nerve may not be anesthetized by an IANB and therefore an area of buccal gingiva adjacent to the lower posterior teeth will retain normal sensation unless that nerve is anesthetized separately, via a (long) buccal nerve block. anesthesia (numbness) in the areas of the mouth and face innervated by one

== Symptoms of anesthesia == 8a54ff5ef9 The typical form results in episodes of severe, sudden, shock-like pain in one side of the face that lasts for seconds to a few minutes. Groups of these episodes can occur over a few hours. The atypical form results in a constant burning pain that is less severe. Episodes may be triggered by any touch to the face. Both forms may occur in the same person. Pain from the disease has been linked to mental-health issues, especially depression. 8a54ff5ef9
