Exfoliation was first practiced among the ancient Egyptians. This was also used in Asia, specifically in China, during the Qing Dynasty (1644-1912). cb9a3949b1 Treatment is only needed if it is causing symptoms. This may include salicylic acid, cryotherapy, chemo-based fluorouracil or bleomycin, and surgical removal. The skin atop the lesion should generally be removed before treatment. In about a third to two-

thirds of cases, they go away without specific treatment, but this may take a few years. Plantar warts are common. Children and young adults are most often affected. **Uses** **Fitting** **Cause** Normally, a callus will form on any part of the skin exposed to excess friction over a long period of time. Activities that are known for causing calluses include construction work and craftwork, the arts, food preparation, many sports and physical activities, and fashion choices like wearing high heels. **History** Calluses are generally not harmful and help prevent blisters, as well as offering protection. However, excessive formation may sometimes lead to other problems, such as a skin ulceration or infection, or cause the affected person to try to offload the affected painful area, which can place excessive stress on the asymptomatic side. In the United States, podiatrists are educated and licensed as Doctors of Podiatric Medicine (DPM). The DPM superseded the historical DSC (Doctor of Surgical Chiropody) degree in the 1960s. The preparatory education of most podiatric physicians—similar to the paths of traditional physicians (MD or DO)—includes four years of undergraduate work, followed by four years in an accredited podiatric medical school, followed by a three- or four-year hospital-based podiatry residency. Optional one- to two-year fellowship in foot and ankle reconstruction, surgical limb salvage, sports medicine, plastic surgery, pediatric foot and ankle surgery, and wound care is also available. Podiatric medical residencies and fellowships are accredited by the Council on Podiatric Medical Education (CPME). The overall...
