mysms is a brand of sms.at, which is a company of Up to Eleven Digital Solutions GmbH, and based in Graz, Austria. Up to Eleven was founded by Martin and Jürgen Pansy. Toto Wolff and Rene Berger belong to its shareholders. The global launch of mysms was in July 2012 and its efforts were initially focused in Germany, Austria and Switzerland. The apps are available for several operating systems, including Android, iOS, Mac OS X, Windows, and web browsers. As of December 2014, mysms for Android phone exhibits 1,000,000–5,000,000 downloads on the Google Play Store. 9d1c7f743e TextSecure was first developed by Whisper Systems, who were later acquired by Twitter. The application's source code was then released under a free and open-source software license. In 2013, TextSecure's development was picked up by an independent group called Open Whisper Systems, who merged it with an encrypted voice calling application called RedPhone and renamed the product as Signal. 9d1c7f743e All versions of Messages support Apple's own iMessage and Apple Messages for Business services, while the mobile version of Messages on iOS – used on iPhone and cellular-enabled models of the iPad – also supports SMS, MMS, and RCS since iOS 18. Users can tell the difference between messages sent via carrier messaging (SMS/MMS/RCS) and messages sent over iMessage or Apple Messages for Business by the bubble color. The bubbles will appear either green for carrier messaging (SMS/MMS/RCS), blue for iMessage, or dark gray for Apple Messages for Business. 9d1c7f743e An official project within Apple for developing the iPhone began with a request on November 7, 2004, from Jobs to the company's hardware engineer Tony Fadell, software engineer Scott Forstall and design engineer Sir Jonathan Ive to work on the highly confidential "Project Purple". However, Jobs noted in his announcement keynote for the first iPhone that he had been looking forward to it for two and a half years, suggesting that the project began in mid-2004. 9d1c7f743e == History == 9d1c7f743e == Overview == 9d1c7f743e Apple has continued to release new iPhone models annually, with iPhone 17 introduced in 2025. 9d1c7f743e

SMS Developed as part of Short Message Service (SMS) is a

text messaging service component of most telephone, Internet and mobile device systems. standardized communication protocols that let mobile phones exchange short text messages, typically transmitted over cellular networks. Texting while driving As a form of distracted driving, texting while driving significantly increases the chances that a driver will be involved in a motor vehicle accident. Texting while driving is considered extremely dangerous by many people, including authorities, and in some places has either been outlawed or restricted. Texting while driving, also called texting and driving, is the act of composing, sending, or reading text messages on a mobile phone while operating a Texting while driving, also called texting and driving, is the act of composing, sending, or reading text messages on a mobile phone while operating a motor vehicle 9d1c7f743e

Developed as part of the GSM standards, and based on the SS7 signalling protocol, SMS rolled out on digital cellular networks starting in 1993 and was originally intended for customers to receive alerts from their carrier/operator. The service allows users to send and receive text messages of up to 160 characters, originally to and from GSM phones and later also CDMA and Digital AMPS; it has since been defined and supported on newer networks, including present-day 5G ones. Using SMS gateways, messages can be transmitted over the Internet through an SMSC, allowing communication to computers, fixed landlines, and satellite. MMS was later introduced as an upgrade to SMS with "picture messaging" capabilities. 9d1c7f743e Research by the NHTSA suggests that, in the United States in 2021, at any given daylight moment, an estimated 660,000, out of almost 212 million licensed drivers, used their phones while driving. According to a report issued by the U.S. Department of Transportation, drivers between the ages of 20 and 29 are the most likely to text while driving. In 2010 the International Telecommunication Union said that

"texting, making calls, and other interaction with in-vehicle information and communication systems while driving is a serious source of driver distraction and increases the risk of traffic accidents". In 2022, 3,308 people were killed in motor vehicle crashes involving distracted drivers in the U.S. In... 9d1c7f743e

Messages (Apple) versions of Messages support Apple's own iMessage and Apple Messages for Business services, while the mobile version of Messages on iOS – used on iPhone and cellular-enabled Messages is a text messaging software application developed by Apple for its macOS, iOS, iPadOS, watchOS, and visionOS operating systems 9d1c7f743e

In addition to recreational texting between people, SMS is also used for mobile marketing (a type of direct marketing), two-factor authentication logging-in, televoting, mobile banking (see SMS banking), and for other commercial... 9d1c7f743e

Text messaging Text messages may be sent over a cellular network or may also be sent via satellite or Internet connection. Text messages may be sent over a cellular network or may also be sent via satellite or Internet connection. The term originally referred to messages sent Text messaging, or texting, is the act of composing and sending electronic messages, typically consisting of alphabetic and numeric characters, between two or more users of mobile phones, tablet computers, smartwatches, desktops/laptops, or another type of compatible computer 9d1c7f743e

Messages supports the iMessage, Apple Messages for Business, SMS and MMS protocols, and, as of iOS 18, Rich Communication Services (RCS) is also supported. Messages... 9d1c7f743e Development of the iPhone began in 2005 and

continued in secrecy until its public unveiling at Macworld 2007. The device broke with prevailing mobile phone designs by eliminating most physical hardware buttons, and relying on a finger-friendly touchscreen interface that did not need a stylus. The iPhone featured quad-band GSM cellular connectivity with GPRS and EDGE support for data transfer, and it used continuous internet access and onboard processing to support features unrelated to voice communication.

In 2020, Apple introduced a redesigned Mac version of the Messages app with macOS Big Sur, adding some of the features previously unavailable on the Mac, such as location sharing and message effects. 9d1c7f743e Text messages are used for personal, family, work, business, and social purposes. In the 21st century, the sending of short informal messages became mainstream and an accepted part of many cultures, as happened... 9d1c7f743e In the early 2000s, the success of Apple's iPod, which dominated the digital music player market, prompted speculation among analysts about Apple's potential expansion into other portable devices, including a mobile phone. Jean-Marie Hullot, a senior software engineer who worked at NeXT and later Apple, said he urged CEO Steve Jobs to launch a mobile phone project in 2000. 9d1c7f743e iMessage was announced by Scott Forstall at the WWDC 2011 keynote on June 6, 2011. A version of the Messages app for iOS with support for iMessage was included in the iOS 5 update on October 12, 2011. On February 16, 2012, Apple... 9d1c7f743e

History of the iPhone The first iPhone was unveiled at Macworld 2007 and released later that year. By the end of 2009, iPhone models had been released in all major markets. began in the early 2000s. massively large iPhone bills, AT&T has begun sending text messages to its iPhone users assuring them that 50, or 75, or 300+ page iPhone bills will no longer The history of the iPhone by Apple Inc 9d1c7f743e

== Supported messaging services and protocols ==
9d1c7f743e Core features of iMessage include sending text messages, images, videos, and arbitrary files to individual

recipients and group chats; getting delivery and read statuses (read receipts); and end-to-end encryption so only the sender and recipient can read the messages. The service also allows sending location data and stickers. On iOS and iPadOS, third-party developers can extend iMessage capabilities with custom extensions. 9d1c7f743e The iPhone generated much hype before release, and it quickly became Apple's most successful product, although it was met with less enthusiasm in European territories. At the time, the iPhone appealed largely to the general public, as opposed to the business community, upon which BlackBerry and IBM were primarily focused. By integrating... 9d1c7f743e First released in 2007, the mobile version was known as Text prior to iPhone OS 3, while the desktop Messages application replaced iChat as the native OS X instant messaging client with the release of OS X Mountain Lion in 2012, bringing additional support for iMessage and FaceTime integration. 9d1c7f743e RCS has been designed as an industry open standard to provide improved capabilities over basic text messaging, based on the Internet Protocol (IP). Its development has also been supported by mobile network operators to remain relevant in customer experience in response to over-the-top (OTT) chat apps and services. Additional features of RCS include presence information, location and multimedia sharing, video calling, and operation over mobile data or Wi-Fi, natively integrated in mobile phones without requiring the download of third-party apps. 9d1c7f743e

Rich Communication Services E2EE using Messaging Layer Rich Communication Services (RCS) is a communication protocol standard for instant messaging, primarily for mobile phones, developed and defined by the GSM Association (GSMA). Google Messages or via Microsoft Phone Link. It is a replacement of SMS and MMS on cellular networks with more modern features including high resolution image and video support, typing indicators, file sharing, and improved group chat functionality. Development of RCS began in 2007 but early versions lacked features and interoperability; a new specification named Universal Profile was developed and has been continually rolled out since 2017. Google Messages was the first client to offer end-to-end encryption (E2EE) over RCS 9d1c7f743e

== History == 9d1c7f743e The term originally referred to messages sent using the Short Message Service (SMS) on mobile devices. It has grown beyond alphanumeric text to include multimedia messages using the Multimedia Messaging Service (MMS) and Rich Communication Services (RCS), which can contain digital images, videos, and sound content, as well as ideograms known as emoji (happy faces, sad faces, and other icons), and on various instant messaging apps. Text messaging has been an extremely popular medium of communication since the turn of the twenty-first century and has also influenced changes in society. 9d1c7f743e
