Epilepsy A seizure is a sudden burst of abnormal electrical activity in the brain that can cause a variety of symptoms, ranging from brief lapses of awareness or muscle jerks to prolonged convulsions. In some cases, it may be diagnosed after a single unprovoked seizure if clinical evidence suggests a high risk of recurrence. Most adverse effects are dose-related and mild. Some examples include mood changes, sleepiness, or an Epilepsy is a group of neurological disorders characterized by a tendency for recurrent, unprovoked seizures. Isolated seizures that occur without recurrence risk or are provoked by identifiable causes are not considered indicative of epilepsy. depending on how and from whom the data is collected. The diagnosis of epilepsy typically requires at least two unprovoked seizures occurring more than 24 hours apart. These episodes can result in physical injuries, either directly, such as broken bones, or through causing accidents cc95c43485

Talk:1817–24 cholera... cc95c43485 (S,S)-Tetrahydrochrysene cc95c43485 1770–1772 Russian plague cc95c43485 After oral ingestion, ethanol is absorbed via the stomach and intestines into the bloodstream. Ethanol is highly water-soluble and diffuses passively throughout the entire body, including the brain. Soon after ingestion, it begins to be metabolized, 90% or more by the liver. One standard drink is sufficient to almost completely saturate the liver's capacity to metabolize alcohol. The main metabolite is acetaldehyde, a toxic carcinogen. Acetaldehyde is then further metabolized

into ionic acetate by the enzyme aldehyde dehydrogenase (ALDH). Acetate is not carcinogenic and has low toxicity, but has been implicated in causing hangovers. Acetate is further broken down into carbon dioxide and water and eventually eliminated from the body through urine and... cc95c43485 Talk:(von Zumbusch) acute generalized pustular psoriasis cc95c43485 (S)-Equol cc95c43485 11 β -Methyl-19-nortestosterone dodecylcarbonate cc95c43485 Talk:11 α -Hydroxyprogesterone cc95c43485 Talk:(R,R)-Tetrahydrochrysene cc95c43485 1,1,1,2-Tetrafluoroethane cc95c43485 17 β -Aminoestrogen cc95c43485 == Articles == cc95c43485 2022-12-29 via PetScan cc95c43485 Talk:1576 Cocoliztli epidemic cc95c43485 17 α -Dihydroequilin cc95c43485 Talk:16 α -Hydroxyestrone cc95c43485 17 β -Dihydroequilenin cc95c43485 (R,R)-Tetrahydrochrysene cc95c43485 Talk:1793 Philadelphia yellow fever epidemic cc95c43485 1629-31 Italian plague cc95c43485 1-Androsterone cc95c43485 16 α -Iodo-E2 cc95c43485 100,000 Genomes Project cc95c43485 Replace [[with [[Talk: cc95c43485 Talk:17q21.31 microdeletion syndrome cc95c43485 .cancerresearch cc95c43485 1576 Cocoliztli epidemic cc95c43485 1817-24 cholera pandemic cc95c43485 Talk:.cancerresearch cc95c43485

In most cases, no structural or toxicological cause of death is found at autopsy. SUDEP can occur with or without evidence of a preceding seizure, and is often unwitnessed, especially during sleep... cc95c43485 Talk:17 β -Aminoestrogen cc95c43485 1788 Doctors' riot cc95c43485 1837 Great Plains smallpox epidemic cc95c43485 100K Genome Project cc95c43485 (von Zumbusch) acute generalized pustular psoriasis cc95c43485 Talk:10/90 gap cc95c43485 17 β -Dihydroequilin cc95c43485 16 β ,17 α -Epiestriol cc95c43485 Talk:17 β -Dihydroequilin cc95c43485 1858 Bradford sweets poisoning cc95c43485 1854 Broad Street cholera outbreak

cc95c43485 Talk:11 β -Hydroxyprogesterone cc95c43485 16 α -LE2 cc95c43485 Depressants are closely related to sedatives as a category of drugs. The terms may sometimes be used interchangeably or may be used in somewhat different contexts. Nearly all commonly used depressants are addictive, and use of them carries the risk of death from respiratory depression, especially in opioids. cc95c43485 Talk:1770-1772 Russian plague cc95c43485 16 α -Hydroxyestrone cc95c43485 Talk:15 β -Hydroxycyproterone acetate cc95c43485 Talk:100K Pathogen Genome Project cc95c43485 17q21.31 microdeletion syndrome cc95c43485 Talk:11 β -Methyl-19-nortestosterone cc95c43485 13q deletion syndrome cc95c43485 15 β -Hydroxycyproterone acetate cc95c43485 1793 Philadelphia yellow fever epidemic cc95c43485 Talk:1% rule (aviation medicine) cc95c43485 Talk:11 β -Methyl-19-nortestosterone dodecylcarbonate cc95c43485 Talk:(S,S)-Tetrahydrochrysene cc95c43485 Talk:1,1,1,2-Tetrafluoroethane cc95c43485 Talk:17-beta-hydroxysteroid dehydrogenase III deficiency cc95c43485

Pharmacology of ethanol The complete list of mechanisms remains an area of research, but ethanol has been shown to affect ligand-gated ion channels, particularly the GABAA receptor. In the body, ethanol primarily The pharmacology of ethanol involves both pharmacodynamics (how it affects the body) and pharmacokinetics (how the body processes it). In the body, ethanol primarily affects the central nervous system, acting as a depressant and causing sedation, relaxation, and decreased anxiety. pharmacology of ethanol involves both pharmacodynamics (how it affects the body) and pharmacokinetics (how the body processes it) cc95c43485
