After Gossip Girl posts a picture of Serena looking at pregnancy tests, everyone thinks that she must be pregnant. Jenny, Dan, and Rufus see the news online, and Dan worries about the right thing to say. After hearing about the Gossip Girl blast while with Eric, Serena runs into a frazzled Dan who blurts out that he loves her. Serena tells him that she is not pregnant, and goes to find Blair. It is revealed that Serena bought the test for her because Blair mentioned that her period was late. Blair refuses to take the test since everything is going so well in her life, including her reinforced relationship with Nate. Dan tells Rufus about what happened between him and Serena, and he says that it's a good thing it was just a scare, because they need to take some time and slow down. Jenny tells Dan that if he really does love Serena, he should tell her again in a more personal way.

== Early life and education == "Sperm theft", also known as "unauthorized use of sperm", "spermjacking" or "spurgling" (a portmanteau of sperm and burgling), refers to a specific form of forced fatherhood in which a man's semen is used to impregnate a woman without his consent. Although the term uses the word "theft", it more closely falls under a state of fraud or breach of contract. Stealing of sperm in itself without using it for successful insemination is not illegal and is difficult to prove. It usually has no bearing on issues like child support. It is considered an issue in the men's rights movement. Forced fatherhood falls into three main categories:

DNA testing is currently the most advanced and accurate technology to determine parentage. In a DNA paternity test, the result (called the 'probability of parentage) is 0% when the alleged parent is not biologically related to the child, and the probability of parentage is typically 99.99% when the alleged parent is biologically related to the child. However, while almost all individuals have a single and distinct set of genes, rare... DNA paternity testing Paternity testing can now also be performed while the woman is still pregnant from a blood draw. Paternity testing can be essential when the rights and duties of the father are in issue, and a child's paternity is in doubt. The current paternity testing techniques are polymerase chain reaction (PCR) and restriction fragment length polymorphism (RFLP). Paternity testing can be essential DNA paternity testing uses DNA profiles to determine whether an individual is the biological parent of another individual. Though genetic testing is the most reliable standard, older methods also exist, including ABO blood group typing, analysis of various other proteins and enzymes, or using human leukocyte antigen antigens. Tests can also determine the likelihood of someone being a biological grandparent.  With the character named "Jamie" prior to production, then-Executive Producer Gary Tomlin "toyed with the idea" of putting Rex in a gay storyline and Lavoisier stated in Soap Opera Digest in 2003: "I was asked by the higher powers at the show how I would feel about doing something like that. I said, 'Absolutely, any plot you want to give me, I'll take on strong.' And they said, 'Okay, we just wanted to check.'" However, this idea never realized, with the character repeatedly paired with women. Calling Rex a "heterosexual horndog," Lavoisier noted he "added a glint in [Rex's] eye he'd lifted from Ryan Phillippe's ... Cruel Intentions character of Sebastian. 'They said, 'Sure, go with that. Start with that.' And that was pretty much it."
