The term luteinizing comes from the Latin "luteus", meaning "yellow". This is in reference to the corpus luteum, which is a mass of cells that forms in an ovary after an ovum (egg) has been discharged. The corpus luteum is so named because it often has a distinctive

yellow color. The process of forming the corpus luteum is known as "luteinization", and thus the hormone that triggers this process is termed the "luteinizing" hormone. 9e1965ad65

Point-of-care tests are simple medical tests that can be performed at the bedside. In many cases, the simplicity was not achievable until technology developed not only to make a test possible at all but then also to mask its complexity. For example, various kinds of urine test strips have been available for decades, but portable ultrasonography did not reach the stage of being advanced, affordable, and widespread until the 2000s and 2010s. Today, portable ultrasonography is often viewed as a "simple" test, but there was nothing simple about it until the more complex technology was available. Similarly, pulse oximetry can test arterial oxygen saturation in a quick... 9e1965ad65 These services typically offer comprehensive metabolic panels, lipid profiles, hormone testing, nutritional markers, and increasingly sophisticated biomarker assessments that were traditionally only available through healthcare providers. Over the last decade, a paradigm shift has taken place with consumers seeking greater involvement in decisions affecting their healthcare and with policies that enable this involvement. 9e1965ad65 Spitz was born on February 10, 1950, in Modesto, California, the eldest of three children of Lenore Sylvia (née Smith) and Arnold Spitz. Point-of-care testing This contrasts with the historical pattern in which testing was wholly or mostly confined to the medical laboratory, which entailed sending off specimens away from the point of care and then waiting hours or days to learn the results, during which time care must continue without the desired information. screening, hemoglobin diagnostics, infectious disease testing (such as COVID-19 rapid tests), cholesterol screening and emerging technologies in micronutrient Point-of-care testing (POCT), also called near-patient testing or bedside testing, is defined as medical diagnostic testing at or near the point of care—that is, at the time and place of patient care 9e1965ad65

Between 1968 and 1972, Spitz won nine Olympic golds, a silver, and a bronze, in addition to five Pan American golds, 31 Amateur Athletic Union (AAU) titles, and eight National Collegiate Athletic Association (NCAA) titles.
