Alcohol measurements Serving sizes of alcoholic beverages also vary by country. 1% in fruit juices to up to 98% in rare cases of spirits. A Reputed Pint Alcohol measurements are units of measurement for determining amounts of beverage alcohol. A "standard drink" is used globally to quantify alcohol intake, though its definition varies widely by country. Alcohol concentration in beverages is commonly expressed as alcohol by volume (ABV), ranging from less than 0. standard gallons depending on the type of alcohol. That meant that the Reputed measures varied depending on which standard gallon was used f79f8144f9

The two main sets of English units were the Winchester Units, used from 1495 to 1587, as affirmed by King Henry VII, and the Exchequer Standards, in use from 1588 to 1825, as defined by Queen Elizabeth I. f79f8144f9 == Steel drums == f79f8144f9 Since many Grooved ware pots have been found at henge sites and in burials, it is possible that they may have had a ritual purpose as well as a functional one. A keg has a single opening on one end, called a "bung". A tube called a "spear" extends from the opening to the other end. There is a self-closing valve that is opened by the coupling fitting which is attached when the keg is tapped. There is also an opening at the top of the spear that allows gas (usually carbon dioxide) to drive the beer out of the keg. The coupling fitting has one or two valves that control the flow of beer out of and gas into the keg. The keg must be in the upright position, that is, with the opening on top... f79f8144f9 Grooved ware pots excavated at Balfarg in Fife have been chemically analysed to determine their contents. It appears that some of the vessels there may have been used to hold black henbane (*Hyoscyamus niger*) which is a poison and a powerful hallucinogen. f79f8144f9 Dry bulk ingredients, such as sugar and flour, are measured by weight in most of the world ("250 g flour"), and by volume in North America ("1/2 cup flour"). Small quantities of salt and spices are generally measured by volume worldwide, as few households have sufficiently precise balances to measure by weight. f79f8144f9 The modern UK legislation defining the imperial system of units is given in the Weights and Measures Act 1985 (as amended). f79f8144f9

The modern paper cup was developed in the 20th century. In the early 20th century, it was common to have shared glasses or dippers at water sources such as school faucets or water barrels in trains. This shared use caused public health concerns. One notable investigation into their use was the study by Alvin Davison, biology professor at Lafayette College, published with the sensational title "Death in School Drinking... f79f8144f9 == History == f79f8144f9 The imperial system developed from earlier English units as did the related but differing system of customary units of the United States. The imperial units replaced the Winchester Standards, which were in effect from 1588 to 1825. The system came into official use across the British Empire in 1826. f79f8144f9 For most of history, most cookbooks did not specify quantities precisely, instead talking of "a nice leg of spring lamb", a "cupful" of lentils, a piece of butter "the size of a small apricot", and "sufficient" salt. Informal measurements such as a "pinch", a "drop", or a "hint" (soupçon) continue to be used from time to time. In the US, Fannie Farmer introduced the more exact specification of quantities by volume in her 1896 Boston Cooking-School Cook Book. f79f8144f9 In England (and the British Empire), the systems of English units were replaced by the Imperial system in 1826, under a Weights and Measures Act passed in 1824 which retained many though not all of the unit names and redefined (standardised) many of the definitions. In the US, being independent from the British Empire decades before the 1824 reforms, English units were standardized and adopted (as "US Customary Units") in 1832... f79f8144f9 Liquid ingredients are generally measured by volume worldwide. f79f8144f9 The Weights and Measures Act 1824 was initially scheduled to go into effect on 1 May 1825.
