Diethylene glycol "Indonesia bans all syrup medicines after death of 99 children",. BBC. 2022). October. Reuters. "India declares three cough syrups toxic after child deaths" a7e5cfa366

On December 22, the sale and distribution of Dok-1 Max was temporarily suspended in Uzbekistan, followed by the complete ban of Marion-produced cough syrups one

week later. Uzbek customs officials prevented the distribution of 60,000 boxes of Dok-1 Max in response to the new regulations. In late December, the Indian government also ordered the company's manufacturing plant in Noida, Uttar Pradesh to shutdown production and on January 10, 2023, it suspended Marion's license to conduct business. a7e5cfa366 India is a leading global drug producer, but the quality of some locally marketed medicines has been questioned after previous tragedies. In 2022-2023, dozens of children in Uzbekistan, the Gambia and Cameroon died after taking Indian-made syrups contaminated with ethylene glycol or diethylene glycol. For example, 18 children in Uzbekistan died after ingesting Dok-1 Max, and WHO later found toxic glycols in syrups from India's Marion Biotech. Similarly, a WHO... a7e5cfa366

Toxic cough syrup In these cases, an ingredient in cough syrup, glycerine (glycerol), was replaced with diethylene glycol, a cheaper alternative to glycerine for industrial applications. Diethylene glycol is nephrotoxic and can result in multiple organ dysfunction syndrome (MODS), especially in children. mass poisonings from toxic cough syrup have occurred in developing countries. In these cases, an ingredient in cough syrup, glycerine (glycerol), was replaced Since the 1990s, several mass

poisonings from toxic cough syrup have occurred in developing countries a7e5cfa366

Gambia cough syrup scandal In October 2022, the World Health Organization issued a medical product alert asking regulators to remove Maiden Pharmaceuticals' products from the market. Promethazine Oral Solution, Kofexmalin Baby Cough Syrup, Makoff Baby Cough Syrup, and Magrip N Cold Syrup. The four products were Promethazine Oral Solution, Kofexmalin Baby Cough Syrup, Makoff Baby Cough Syrup, and Magrip N Cold Syrup. [excessive citations] Indian authorities started The Gambia cough syrup scandal refers to the deaths of 70 children in The Gambia from the consumption of four cough syrups manufactured in India a7e5cfa366

Indian authorities started investigating an April 2023 allegation that a pharmaceutical regulator in Haryana state, who holds a senior position in the state health department, accepted a bribe and switched samples of contaminated cough syrup

before the state government laboratory tested them. Maiden Pharmaceuticals produced the cough syrup in question, and it has been implicated in child deaths in Gambia. The bribery allegation indicates that Maiden Pharmaceuticals had foreknowledge that their cough syrup was tainted. Tests conducted by two independent laboratories on behalf of the WHO confirmed the presence of lethal toxins—ethylene glycol and diethylene glycol in the syrup. Indian authorities, however, did not find any toxins but did identify labeling issues... a7e5cfa366 == Background == a7e5cfa366

2025 India cough syrup crisis in syrups from India's Marion Biotech. Investigations showed that at least one of the implicated syrups, Coldrif, produced by Sresan Pharmaceuticals, contained extremely high levels of the industrial solvent diethylene glycol (DEG). Another incident in Rajasthan involved a government-distributed cough syrup containing the active ingredient dextromethorphan hydrobromide made by Kayson Pharma. Similarly, a WHO investigation attributed dozens of child deaths in the Gambia to four Indian cough syrups contaminated In late 2025, India experienced a deadly outbreak of cough syrup poisoning that primarily struck children in the central state of Madhya Pradesh and the neighbouring state of Rajasthan. Dozens of

young children fell ill and many died after taking locally sold cough medicines. The World Health Organization also issued global alerts about the contaminated syrups

Asida carob syrup or date syrup in southern parts of Tunisia. Aseedah or aseed (Arabic: أسيداه) is one of the staple dishes in Yemen and is usually served for lunch

There have been poisonings in Haiti, Bangladesh, Indonesia, Marshall Islands, Pakistan, Panama, The Gambia, India (twice), Uzbekistan, and Cameroon between 1992 and 2022, due to contaminated cough syrup and other medications that incorporated inexpensive diethylene glycol instead of glycerine.

Common cold review concluded that “zinc (lozenges or syrup) is beneficial in reducing the duration and severity of the common cold in healthy people, when taken within

Shavkat Mirziyoyev, the current President of Uzbekistan...

Uzbekistan cough syrup scandal It was caused by the toxic levels of diethylene glycol and ethylene glycol in cold medicines produced by the Indian company Marion Biotech, such as the Dok-1 Max brand. Subsequently, the Indian government investigated Marion Biotech's manufacturing processes, while Uzbek authorities opened a criminal case against members of the health system that had contributed to the children's deaths, such as regulatory officials and pharmacy administrators. The Uzbekistan cough syrup scandal was a series of poisonings that resulted in the deaths of 18 children in Samarkand and two more children elsewhere The Uzbekistan cough syrup scandal was a series of poisonings that resulted in the deaths of 18 children in Samarkand and two more children elsewhere in Uzbekistan in December 2022 and January 2023 a7e5cfa366
