provide additional nutrition for the growth of the embryo (when fertilized). Egg whites contain about 56% of the protein in the Egg white is the clear liquid (also called the albumen or the glair/glaire) contained within an egg. It forms around fertilized or unfertilized egg yolks. is high in lipids (fats), egg white contains almost no fat, and carbohydrate content is less than 1%. In chickens, it is formed from the layers of secretions of the anterior section of the hen's oviduct during the passage of the egg 713180d946

Egg white consists of about 90% water into which about 10% proteins (including albumins, mucoproteins, and globulins) are dissolved. Unlike the yolk, which is high in lipids (fats), egg white contains almost no fat, and carbohydrate content is less than 1%. Egg whites contain about 56% of the protein in the egg. Egg white has many uses in food (e.g. meringue, mousse) as well as many other uses (e.g. in the preparation of vaccines such as those for influenza). 713180d946

Omelette The earliest omelettes are believed to have been cooked in ancient. Whole eggs or egg whites are often beaten
