On May 5th, 100 species of insects were collected, the larger ones were snakes, the smaller ones were lice. Place them inside, let them eat each other, and keep what is left of the last species. If it is a snake, it is a serpent, if it is a louse, it is a louse. Do this and kill a person. It is said to have been widely used in ancient China. It is not clear for how long it has been used, but scholars of Chinese characters such as Shizuka Shirakawa, who advocates the importance of magic in ancient times, have found traces of poison in the oracle bone script of the Yin and Zhou dynasties. The earliest record of worms is in the Geography of the Suishu, which reads:

Kodoku In return the owner is supposed to feed the bug. Neglecting to do so would enrage the insect, if the owner does not equivalently repay the insect by placing Kodoku (呪毒, 'curse poison'), also called kodō (呪道, 'curse method'), kojutsu (呪術, 'curse technique') and fuko (呪物, 'sorcery curse'), is a type of poisonous magic found in Japanese folklore. It is the Japanese derivative of the Chinese gu magic

Gastroenteritis is usually caused by viruses; however, gut bacteria, parasites, and fungi can also cause gastroenteritis. In children, rotavirus is the most common cause of severe disease. In adults, norovirus and Campylobacter are common causes. Eating improperly prepared food, drinking contaminated water, or having close contact with an infected person can spread the disease. Treatment is generally the same with or without a definitive diagnosis, so testing to confirm is usually not needed.

Shellac Chemically, it is mainly composed of aleuritic acid, jalaric acid, shellolic acid, and other natural waxes. Shellac functions as a tough natural primer, sanding sealant, tannin-blocker, odor-blocker, stain, and high-gloss varnish. Shellac (/ʃəˈlæk/) is a resin secreted by the female lac bug on trees in the forests of India and Thailand. Phonograph and 78 rpm gramophone records were made of shellac until it was replaced by vinyl.
