Cortisol is produced in many animals, mainly by the zona fasciculata of the adrenal cortex in an adrenal gland. In other tissues, it is produced in lower quantities. By a diurnal cycle, cortisol is released and increases in response to stress and a low blood-glucose concentration. It functions to increase blood sugar through gluconeogenesis, suppress the immune system, and aid in energy metabolism. It also decreases bone formation. These stated functions are carried out by cortisol binding to glucocorticoid or mineralocorticoid receptors inside a cell, which then bind to DNA to affect gene expression. 95794b4e69 Prior to founding the company, Banish founder Daisy Jing created a YouTube channel called The Acne Channel, where she uploaded videos about her experiences with acne. Jing initially planned to study Pre-Med at Duke University in order to become a dermatologist, before switching her major. After discovering microneedling and vitamin C treatments, she began creating her own skin products in her kitchen. She founded Banish on September 25, 2013. Banish was on the Inc. 5000 list in 2017. In 2019, Jing discussed the experiences that led to founding Banish in a TEDx talk at Georgia Tech. 95794b4e69

In the original story, Kirk Langstrom was a zoologist who experimented with bat DNA, creating an extract that could supposedly give humans the acute sonar sense of a bat. After testing it on himself, he mutated into an anthropomorphic, feral half-bat hybrid, lacking sapience and acting purely on instinct. Batman managed to reverse the transformation, but Langstrom would return as the Man-Bat time and time again, albeit not necessarily as a villain, as Langstrom would sometimes retain enough sanity to use his powers for good. Several other characters have since

appeared as similar Man-Bat creatures, including Langstrom's wife Francine, his father Abraham Langstrom, Francine's father Robert March, and some League of Assassins operatives that make up the Man-Bat Commandos... 95794b4e69 The use of toners in skincare emerged in the early 20th century as a response to the limitations of harsh, alkaline, soap-based facial cleansers. These early cleansers, while effective in removing dirt and oil, were often harsh on the skin. They could disrupt the skin's natural pH balance, leaving behind a scum or residue that made the skin feel dry and irritated. Toners were developed as a solution aimed at restoring the skin's natural acidity. Initially, they were primarily formulated with astringent ingredients... 95794b4e69
