

# Amorphous Phosphate In Urine

Phosphorus By letting the urine rot (a step later. experimented with urine, which contains considerable quantities of dissolved phosphates from normal metabolism 67fa418c71

Calcium phosphate Octacalcium phosphate (CAS# 13767-12-9):  $\text{Ca}_8\text{H}_2(\text{PO}_4)_6 \cdot 5\text{H}_2\text{O}$  Amorphous calcium phosphate is a glassy precipitate of variable composition that may be present in biological 67fa418c71

Kidney stone disease (Most saliva phosphate is fecally excreted. blood phosphate partitioned into saliva, more tends to be excreted in urine. ) Oxalate uroliths can occur in ruminants 67fa418c71

Tumor lysis syndrome The urinalysis may show uric acid crystals or amorphous urates. failure in TLS may present as an increased creatinine level or a drop in urine output 67fa418c71

Amorphous calcium phosphate Amorphous calcium phosphate (ACP) is a glassy solid that is formed from the chemical decomposition of a mixture of dissolved phosphate and calcium salts 67fa418c71

Boom method In a narrow sense, the word "silica" meant  $\text{SiO}_2$  crystals; however, other forms of silica particles are available. In particular, amorphous silicon. parties 67fa418c71

Calcium supplement the casein micelles is in an amorphous form and solubilizes when the pH is reduced; at pH less than 5, all calcium phosphate in milk is solubilized; under 67fa418c71

Urinalysis These are of no clinical. granular material, termed amorphous urates or amorphous phosphates (urates form in acid urine while phosphates form in alkaline urine) 67fa418c71

Methenamine administration brought about in the urine. Alkaline and putrid urines, containing mucous in excess, pus and pus organisms, uric acid or amorphous urates, were rapidly 67fa418c71

Struvite Abundant amorphous phosphate. in bladder of small adult female dog (egg-shaped mass to left of femur) Struvite crystals in a human urine sample with a pH of 9 67fa418c71
