

Bite Of Black Widow

Initially... cc06d2c5ab == Signs and symptoms == cc06d2c5ab The Black Widow makes five appearances during the period fans and historians call the Golden Age of comic books, all five written by George Kapitan. These short comics stories (the longest is eight pages, the shortest five) are spread among three different Timely anthology titles over a three-year period from 1940 to 1943. cc06d2c5ab Most spiders do not cause bites that are of importance. For a bite to be significant, substantial envenomation is required. Bites from the widow spiders involve a neurotoxic venom which produces a condition known as latrodectism. Symptoms may include pain which may be at the bite or involve the chest and abdomen, sweating, muscle cramps and vomiting among others. Bites from the recluse spiders cause the condition loxoscelism, in which local

necrosis of the surrounding skin and widespread breakdown of red blood cells may occur. Headaches, vomiting and a mild fever may also occur. Other spiders that can cause significant bites include the Australian funnel-web spider and South American wandering spider.

Steatoda spiders (including true black widows), crickets, ladybugs, cockroaches, and woodlice. Some members of this genus do have bites which are reported to have cc06d2c5ab

Symptoms of a bite depend on the amount of venom injected. A bite of *Latrodectus* may not inject any venom (known as a dry bite), and so no illness occurs. About 75% of "wet" bites will have localized pain and little more. If, however, there is a substantial dose, a bite can cause latrodectism. The main symptoms are generalized muscle

pain, stomach cramps, nausea and vomiting. cc06d2c5ab There are several spider species all named black widow: southern black widow spider (*L. mactans*), the European black widow (*L. tredecimguttatus*), Western black widow spider (*L. hesperus*), Northern black widow spider (*L. variolus*). Other *Latrodectus* that cause latrodectism are the Australian redback spider (*L. hasselti*), the New Zealand katipō spider (*L. katipo*) and the South American *Latrodectus corallinus* and *Latrodectus curacaviensis*. Several other members of the genus *Latrodectus* are not commonly associated with latrodectism, including the cosmopolitan brown widow (*L. geometricus*).
