Enkapune Ya Muto 2 m thick layer that has low densities Enkapune Ya Muto, also known as Twilight Cave, is a site spanning the late Middle Stone Age to the Late Stone Age on the Mau Escarpment of Kenya. Inferences pertaining to climate and environment changes during the pre-Holocene and Holocene period have been made based from faunal remains based in this site. The only faunal assemblage to be found were bovids, hyrax, and roan. little to no occupation prior to 40,000 BP. Beads made of perforated ostrich egg shells found at the site have been dated to 40,000 years ago. The beads found at the site represent the early human use of personal ornaments. This time span has allowed for further study of the transition from the Middle Stone Age to the Late Stone Age. In particular, the changes in lithic and pottery industries can be tracked over these time periods as well as transitions from a hunter-gatherer lifestyle to a herding lifestyle. Brazilian Portuguese differs from varieties spoken in Portugal and Portuguese-speaking African countries, particularly in phonology and prosody. In Africa, the language tends to have a closer connection to contemporary European Portuguese, influenced by the more recent end of Portuguese colonial rule. This has contributed to a notable difference in the relationship between written, formal language and spoken forms in Brazilian Portuguese. The differences between formal written Portuguese and informal spoken varieties in Brazilian Portuguese have been documented in sociolinguistic studies. Some scholars, including Mario A. Perini, have suggested that these differences might exhibit characteristics of diglossia, though this interpretation remains a subject of debate among linguists. Other researchers argue that such variation aligns with patterns... f7b9dde96f Bipolar... f7b9dde96f

The disorder is often underdiagnosed due to its hypomanic episodes not being as disruptive as the full mania seen in Bipolar I. Bipolar II tends to be chronic and can significantly impact a person's social, professional, and emotional life. Though the causes are not fully understood, a combination of genetic, environmental, and neurobiological factors is believed to play a role. f7b9dde96f From 1966 to 2000, the Atlantic Richfield Company, doing business as ARCO, was an independent American oil company with operations in the United States, Indonesia, the North Sea, the South China Sea and Mexico. Hypotension Blood pressure is the force of blood Hypotension, also known as low blood pressure, is a cardiovascular condition characterized by abnormally reduced blood pressure. also known as low blood pressure, is a cardiovascular condition characterized by abnormally reduced blood pressure. However, in practice, blood pressure is considered too low only if noticeable symptoms are present. Blood pressure is the force of blood pushing against the walls of the arteries as the heart pumps out blood and is indicated by two numbers, the systolic blood pressure (the top number) and the diastolic blood pressure (the bottom number), which are the maximum and minimum blood pressures within the cardiac cycle, respectively. A systolic blood pressure of less than 90 millimeters of mercury (mmHg) or diastolic of less than 60 mmHg is generally considered to be hypotension. Different numbers apply to children f7b9dde96f
