Blue The term blue generally describes colours perceived by humans observing light with a dominant wavelength between approximately 450 and 495 nanometres. An optical effect called the Tyndall effect explains blue eyes. Distant objects appear more blue because of another optical effect called aerial perspective. It lies between violet and cyan on the spectrum of visible light. The clear daytime sky and the deep sea appear blue because of an optical effect known as Rayleigh scattering. blue comes from Middle English bleu or blewe, from the Old French bleu, a word of Germanic origin, related to the Old High German word blao (meaning ‘shimmering Blue is one of the three primary colours in the RGB (additive) colour model, as well as in the RYB colour model (traditional colour theory) d08010e460

Jamaican Blue Mountain Coffee is an Arabica coffee-bean variety called Typica, which originated in southwestern Ethiopia. d08010e460 Blue has been an important colour in art and decoration since ancient times. The semi-precious stone lapis lazuli was used in ancient Egypt for jewellery and ornament and later, in the Renaissance, to make the pigment ultramarine, the most expensive of all pigments. In the eighth century Chinese artists used cobalt blue to colour fine blue and white porcelain. In the Middle Ages, European artists used it in the windows of cathedrals. Europeans wore clothing coloured with the vegetable dye woad until it was replaced by the finer indigo from America. In the 19th century... d08010e460
