Grain entrapment Usually, unstable grain collapses suddenly, wholly or partially burying workers who may be within it. It most frequently occurs in grain bins and other storage facilities such as silos or grain elevators, or in grain transportation vehicles, but has also been known to occur around any large quantity of grain, even freestanding piles outdoors. Grain entrapment, or grain engulfment, occurs when a person becomes submerged in grain and cannot get out without assistance. Engulfment has a very high fatality rate. Entrapment occurs when victims are partially submerged but cannot remove themselves; engulfment occurs when they are completely buried within the grain. Pound's contribution to poetry began in the early 20th century with his role in developing Imagism, a movement stressing precision and economy of language. Working in London as foreign editor of several American literary magazines, he helped to discover and shape the work of contemporaries such as H.D., Robert Frost, T. S. Eliot, Ernest Hemingway, and James Joyce. He was responsible for the 1914 serialization of Joyce's *A Portrait of the Artist as a Young Man*, the 1915 publication of Eliot's "The Love Song of J. Alfred Prufrock", and the serialization from 1918 of Joyce's *Ulysses*. Hemingway wrote in 1932 that, for poets born in the late 19th or early 20th century, not to be influenced by Pound would be "like passing through a great blizzard and not feeling its cold". 3d85015c57

In the historical context of traditional Chinese culture within which the concept of bigu developed, there was great symbolic importance connected with the five grains and their importance in sustaining human life, exemplified in various myths and legends from ancient China and throughout subsequent history. The concept of bigu developed in reaction to this tradition, and within the context of Daoist philosophy. 3d85015c57
