Impact of the COVID-19 pandemic on the African diaspora medical visits, tests, treatments, and medications because of cost. These disparities are believed to originate from structural racism in these countries which pre-dates the pandemic; a commentary in The BMJ noted that "ethnoracialised differences in health outcomes have become the new normal across the world" as a result of ethnic and racial disparities in COVID-19 healthcare, determined by social factors. Data from the United States and elsewhere shows that minorities, especially people of African descent, have been infected and killed at a disproportionate rate to people of European descent. As the COVID-19 virus made its way throughout the United States, testing kits were distributed The COVID-19 pandemic has revealed race-based health care disparities in many countries, including the United States, United Kingdom, Norway, Sweden, Canada, and Singapore

COVID-19 pandemic in Ghana Timeline of the COVID-19 pandemic in Ghana. The first two cases in Ghana were confirmed on 12 March 2020, when two infected people arrived in

Ghana, one from Norway and the other from Turkey. A former general secretary of the New Patriotic Party died after testing positive for COVID-19 at the Intensive The COVID-19 pandemic in Ghana was a part of the worldwide pandemic of coronavirus disease 2019 (COVID-19) caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2)

The number of deaths may be much higher than what has been reported as those who died with acute COVID-19 symptoms but had not been confirmed or tested were not counted in the official death figure. On 12 January 2020, the World Health Organization (WHO) confirmed that the novel coronavirus was the cause of a respiratory illness that affected a cluster of people in Wuhan City, Hubei Province, China. This was reported to the WHO on 31 December 2019. On 11 March 2020, the World Health Organization declared the novel COVID-19 a pandemic. The first reported case involving a Sri Lankan outside the country was reported in Italy on 3 March 2020. As of 23 March 2020, forty-five quarantine centres had been built in the country by the Sri Lanka Army as a preventative measure in an attempt to stop the spread of the pandemic. Nearly 3,500 people were placed under quarantine in 45 quarantine centres, including 31 foreigners from 14 countries. As of 25 March 2020, Sri Lankan authorities tracked down over 14,000 people who had come into contact with identified patients, and ordered those people to self-quarantine. As of 16 April 2020, Sri Lanka was named the 16th highest... Although the government rapidly implemented containment measures and public health responses, the country had experienced one of the most severe COVID-19 outbreaks in Southeast Asia by late 2020. The UN raised concerns about Myanmar's vulnerability to the pandemic due to its weak healthcare infrastructure following poor investment over six decades of military rule, as well as ongoing internal conflict. Hours after the ceremony, Trump tested positive for COVID-19, although the public would not learn of this result until one year later, in October 2021. Trump himself may...

COVID-19 pandemic in Nepal The first death occurred on 14 May. returned to Kathmandu from Wuhan on 9 January, tested positive. The viral disease has been detected in all provinces and districts of the country, with Bagmati Province and Kathmandu being the worst hit province and district respectively. It was also the first recorded case of COVID-19 in South Asia. As of 26 July 2022, the Ministry of Health and Population (MoHP) has confirmed a total of 984,475 cases, 968,802 recoveries, and 11,959 deaths in the country.
