

Journal Impact Factor 2024

In September 1811, Boston physician John Collins Warren, along with James Jackson, submitted a formal prospectus to establish the New England Journal of Medicine and Surgery and Collateral Branches of Science as a medical and philosophical journal. Subsequently, the first issue of the New England Journal of Medicine and Surgery and the Collateral Branches of Medical Science was published in January 1812. The journal was published quarterly.

Journal ranking Journal rankings are intended to reflect Journal ranking is widely used in academic circles in the evaluation of an academic journal's impact and quality. Journal rankings are intended to reflect the place of a journal within its field, the relative difficulty of being published in that journal, and the prestige associated with it. Journal ranking is widely used in academic circles in the evaluation of an academic journal's impact and quality. They have been introduced as official research evaluation tools in several countries

== History ==

Impact factor While frequently used by universities and funding bodies to decide on promotion and research proposals, it has been criticised for distorting good scientific practices. Impact factor is a scientometric index calculated by Clarivate's Web of Science. The impact factor (IF) or journal impact factor (JIF) of an academic journal is a type of journal ranking. Journals with higher impact-factor values are The impact factor (IF) or journal impact factor (JIF) of an academic journal is a type of journal ranking. The impact factor of a journal reflects the yearly mean number of article citations published in the last two years. Journals with higher impact-factor values are considered more prestigious or important within their field

In 1823, another publication, the Boston Medical Intelligencer, appeared under the editorship of Jerome V. C. Smith. The impact factor was devised by Eugene Garfield, the founder of the Institute for Scientific Information (ISI) in Philadelphia. Impact factors began to be calculated yearly starting from 1975 for journals listed in the Journal Citation Reports (JCR). ISI was acquired by Thomson Scientific & Healthcare in 1992, and became known as Thomson

ISI. In 2018, Thomson-Reuters spun off and sold ISI to Onex Corporation and Baring Private Equity Asia. They founded a new corporation, Clarivate, which continued publishing the JCR. 9ea304ce48

The Journal of Neuroscience Its editor-in-chief is Sabine Kastner (Princeton University), who succeeded Marina Picciotto (Yale University) in 2024. According to the latest Journal Citation Reports, the journal has a 2024 impact factor of 4. (Yale University) in 2024. It covers empirical research on all aspects of neuroscience. The journal was established in The Journal of Neuroscience, stylized as JNeurosci, is a weekly peer-reviewed scientific journal published by the Society for Neuroscience (SfN). According to the latest Journal Citation Reports, the journal has a 2024 impact factor of 4 9ea304ce48

Feminist Economics (journal) 0 and a 5-year impact factor of 3. This places it 13th Feminist Economics is a peer-reviewed academic journal published by Routledge and the International Association for Feminist Economics (IAFFE) in the field of feminist economics. 8 in 2024. According to the Journal Citation Reports, the journal had a Journal Impact Factor of 2 9ea304ce48

Journal of Medical Ethics According to the Journal Citation Reports, the journal has a 2024 impact factor of 3. The editors-in-chief are Brian D. 4. It is owned by the Institute of Medical Ethics and BMJ and published by BMJ. 4. According to the Journal Citation Reports, the journal has a 2024 impact factor of 3. Earp The Journal of Medical Ethics (JME) is a monthly peer-reviewed academic journal covering the field of bioethics that was established in 1975. BMJ and published by BMJ 9ea304ce48

Theoretical Computer Science (journal) According to the Journal Citation Reports, the journal has a 2024 impact factor of 1. It was established in 1975. It is abstracted and indexed by Scopus and the Science Citation Index Expanded. "Theoretical Computer Science". 2024 Journal Citation Reports Theoretical Computer Science is a peer-

reviewed scientific journal covering computer science published by Elsevier. According to the Journal Citation Reports, the journal has a 2024 impact factor of 1

In 1828, the editors of the New England Journal of Medicine and Surgery and the Collateral Branches of Medical Science purchased the weekly Intelligencer for \$600, merging the two publications to form the Boston Medical and Surgical Journal, and shifting from quarterly to weekly publication. The editors-in-chief are Brian D. Earp (National University of Singapore), Lucy Frith (University of Manchester) and Arianne Shahvisi (Brighton and Sussex Medical School). Previous editors have been: John McMillan (University of Otago) (2018-2025), Julian Savulescu (University of Oxford and National University of Singapore) (2011–2018 and 2001–2004), Søren Holm (Cardiff University) and John Harris (University of Manchester, (jointly, 2004–2011), Raanan Gillon (Imperial College London, 1980–2001), and Alastair Campbell (University of Edinburgh, 1975–1980, founding editor). Elissa Braunstein (Colorado State University) became Co-Editor of Feminist Economics in 2017, taking over as Editor in 2020. Traditionally, journal ranking "measures" or evaluations have been provided simply through institutional lists established by academic leaders or through a committee vote. These approaches have been notoriously politicized and inaccurate reflections of actual prestige and quality, as they would often reflect the biases and personal career objectives of those involved in ranking the journals; also causing the problem of highly disparate evaluations across institutions. Consequently, many institutions have required external sources of evaluation of journal quality. The traditional approach here has been through surveys of leading academics in a given field, but this approach too has potential for bias, though not as profound as that seen with institution-generated lists. Consequently, governments,...

Journal Citation Reports It provides information about academic journals in the natural and social sciences, including impact factors. JCR was originally published as a part of the Science Citation Index. Into the 21st century, the JCR, as a distinct service, is based on citations compiled from the Science Citation Index Expanded and the Social Sciences Citation Index. It provides information about academic journals in the natural and social sciences, including impact factors. As of the 2023 edition, journals from the Arts and Humanities Citation Index and the Emerging Sources Citation

Index have also been included. JCR was originally published as a part Journal Citation Reports (JCR) is an annual publication by Clarivate. It has been integrated with the Web of Science and is accessed from the Web of Science Core Collection

History The journal publishes research that advances artificial intelligence through novel methods, theories, and principled approaches. It covers a broad range of AI topics and emphasizes novelty, technical soundness, and demonstrated effectiveness. Application-oriented papers are expected to show how novel AI methods provide meaningful improvements over conventional approaches.

History The journal was established in 1981 and issues appeared monthly; as its popularity grew it switched to a biweekly schedule in 1996 and then to a weekly in July 2003. According to the Journal Citation Reports, the journal had a Journal Impact Factor of 2.0 and a 5-year impact factor of 3.8 in 2024. This places it 13th out of 70 journals (Q1) in Women's Studies and 212th out of 617 journals (Q2) in Economics.

The New England Journal of Medicine Its 2024 impact factor was 78. 5, ranking it 2nd out of 168 journals in the category "Medicine, General & Internal". most prestigious peer-reviewed medical journals. Founded in 1812, the journal is among the most prestigious peer-reviewed medical journals. Its 2024 impact factor was 78. 5, ranking it 2nd out of 168 journals in the category "Medicine, General & Internal". The New England Journal of Medicine (NEJM) is a weekly medical journal published by the Massachusetts Medical Society
