

Burdock Root Burdock Root

Root vegetable sativus) Celeriac. (kohlrabi, rutabaga and turnip) Bunium persicum (black cumin) Burdock (Arctium, family Asteraceae) Carrot (Daucus carota subsp. Brassica spp e0eab5075e

Taproot are modified into storage organs. Some plants with taproots: Beetroot Burdock Carrot Sugar beet Dandelion Parsley Parsnip Poppy mallow Radish Sagebrush e0eab5075e

Kinpira The most common variety is kinpira gobō, or braised burdock root. Other vegetables. usually made of root vegetables that have been sautéed and simmered e0eab5075e

== Description == e0eab5075e == History == e0eab5075e

Gobo in Cameroon Gobō (Arctium lappa), a biennial plant Gobo (burdock), the root of the burdock (Arctium), a popular food in Asia Gobo (lighting), a template e0eab5075e

Plants of the genus Arctium have dark green leaves that can grow up to 70 centimetres (28 inches) long. They are generally large, coarse, and ovate, with the lower ones being heart-shaped. They are woolly underneath. The leafstalks are generally hollow. Arctium species generally flower from July through October. Burdock flowers provide essential pollen and nectar for honeybees around August, when clover is on the wane and before the goldenrod starts to bloom. e0eab5075e

Root beer and traditional root beers include allspice, birch bark, coriander, juniper, ginger, wintergreen, hops, burdock root, dandelion root, spikenard, pipsissewa e0eab5075e

Special Herbs, Vol. 9 & 0 3:00 "Burdock Root" - 3:32 "Vervain" - 2:59 "Bergamot" - 3:33 "Podina" - 2:07 "Untitled (Meditation)" - 3:56 "Coltsfoot Leaf" - 3:41 "Orris Root Powder" e0eab5075e

Dandelion and burdock Traditionally, it was made from fermented dandelion (*Taraxacum officinale*) and burdock (*Arctium lappa*) roots, hence the name. It was originally a type of light mead Dandelion and burdock is a beverage originating and commonly consumed in the

British Isles since the Middle Ages. Dandelion and burdock is a beverage originating and commonly consumed in the British Isles since the Middle Ages. It was originally a type of light mead but over the years has evolved into the carbonated soft drink commercially available today

Arctium lappa Australia, and other regions, but is cultivated for its vegetable root. Greater burdock is a biennial plant, rather tall, reaching as much as 3 metres (10

Arctium commonly known as burdock, in the family Asteraceae. Native to Europe and Asia, several species have been widely introduced worldwide. Burdock's clinging properties, in addition to providing an excellent mechanism for seed dispersal, led to the invention of the hook-and-loop fastener. Burdock's clinging properties *Arctium* is a genus of biennial plants commonly known as burdock, in the family Asteraceae. Native to Europe and Asia, several species have been widely introduced worldwide

Dandelion and burdock shares an origin with a number of drinks originally made from lightly fermented root extracts, such as root beer and sarsaparilla, supposedly as a health benefit. The dominant flavour in these other drinks is usually sassafras or wintergreen, both now derived artificially rather than from the plant itself, in part because during the 1960s, safrole, the major component of the volatile oil of sassafras, was found to be carcinogenic in rats. All of these drinks, while tasting similar, do have their own distinct flavour. Dandelion and burdock is most similar in flavour to sarsaparilla.

Tekka condiment that consists of a number of root vegetables (greater burdock roots, carrots, ginger root, and lotus root) which have been stir-fried and boiled
