== Political parties == 850c68007a UCS has a potential capacity of over 1 million characters. Each UCS character is abstractly represented by a code point, an integer between 0 and 1,114,111 ($1,114,112 = 2^{20} + 2^{16}$ or $17 \times 2^{16} = 0x110000$ code points), used to represent each character within... 850c68007a == Discography == 850c68007a The SNS was led by Andrija Mandić. At the last legislative elections in Montenegro, on September 10, 2006, the Serb List, led by the SNS, won 12 out of 81 seats. It was then the largest political group in the Parliament of Montenegro right after the ruling Democratic Party of Socialists-Social Democratic Party coalition. 850c68007a 1 850c68007a

Serb People's Party (Montenegro) The fraction also supported Momir Bulatovic unlike mainstream NS which The Serb People's Party (Serbian: Српска народна странка, CHC / Srpska narodna stranka, SNS) was a political party in Montenegro. The leader of the fraction, Božidar Bojović, was elected the SNS's first leader 850c68007a

Slash (punctuation) equivalent of the modern period and comma, the slash is now used to represent division and fractions, as a date separator, in between multiple alternative The slash is a slanting line punctuation mark, /. It is also known as a stroke or solidus, a forward slash and several other historical or technical names. Once used as the equivalent of the modern period and comma, the slash is now used to represent division and fractions, as a date separator, in between multiple alternative or related terms, and to indicate abbreviation 850c68007a

Maajja Unlike traditional record labels, the label does not own their artists' master recordings. Unlike traditional record labels, Maajja (stylised in all lowercase maajja) is an independent record label and distribution company based out of Toronto and Chennai. At an elementary level the division of two natural numbers is, among other possible interpretations, the process of calculating the number of times one number is contained within another. For example, if 20 apples are divided evenly between 4 people, everyone receives 5 apples (see picture). 850c68007a The use of counting rods for rod calculus flourished... 850c68007a == History == 850c68007a

Egyptian fraction An Egyptian fraction is a finite sum of distinct unit fractions, such as $\frac{1}{2} + \frac{1}{3} + \frac{1}{16}$. $\{\frac{1}{2}\} + \{\frac{1}{3}\} + \{\frac{1}{16}\}$ An Egyptian fraction is a finite sum of distinct unit fractions, such as 850c68007a

The SNS was an ethnic Serb party that promoted the rights of the Serb ethnic group against what it sees as state-sponsored discrimination. Unlike the pro-federalist Socialist People's Party of Montenegro (SNP) which is left-oriented (being social-democratic), the SNS is focused primarily on representing the interests of Serb people in Montenegro around a center-right cultural conservative program. It presented itself as one of the successors to the old People's Party in the founded in 1906 in the Kingdom of Montenegro, alongside the current People's Party of Montenegro. 850c68007a of polynomial equations of up to four unknowns in the work of Zhu Shijie. 850c68007a

Continuous distillation These fractions include at least one volatile distillate fraction, which has boiled and been separately captured as a vapor condensed to a liquid, and practically always a bottoms (or residuum) fraction, which is the least volatile residue that has not been separately captured as a condensed vapor. Distillation is the separation or partial separation of a liquid feed mixture into components or fractions by selective boiling (or evaporation) and condensation. distillation, is an ongoing separation in which a mixture is continuously (without interruption) fed into the process and separated fractions are removed Continuous distillation, a form of distillation, is an ongoing separation in which a mixture is continuously (without interruption) fed into the process and separated fractions are removed continuously as output streams. The process produces at least two output fractions 850c68007a

== History == 850c68007a The division with remainder or Euclidean division of two natural numbers provides an integer quotient, which is the number of times the second number is completely contained in the first number, and a remainder, which is the part of the first number that remains, when in the course of computing the quotient, no further full chunk of the size of the second number can be allocated. For example, if 21 apples are divided between 4 people, everyone receives 5 apples, and 1 apple remains. 850c68007a == Hardware == 850c68007a The basic equipment for carrying out rod calculus is a bundle of counting rods and a counting board. The counting rods are usually made of bamboo sticks, about 12 cm- 15 cm in length, 2mm to 4 mm diameter, sometimes from animal bones, or ivory and jade (for well-heeled merchants). A counting board could be a table top, a wooden board with or without grid, on the floor or on sand. 850c68007a == Overview == 850c68007a Calderón moved to New York City in 1967, and recorded with labels such as Kubaney and BMC. After five years, he returned to the Dominican Republic, only to find that the bachateros had been marginalized, since the genre itself had been associated with poverty and prostitution, and only Radio Guarachita, a nationwide radio station, played it. Disillusioned, Calderón returned to New York, where he found that a Dominican community was growing in Washington Heights, and was able to give rise to a popular bachata scene. Today, with the recent acceptance of bachata in the Dominican Republic and the US, Calderón receives a fraction of the recognition he deserves as one of the forefathers of the national genre. He continues to record and distribute his own recordings. 850c68007a

Division (mathematics) What is being divided is called the dividend, which is divided by the divisor, and the result is called the quotient. The other operations are addition, subtraction, and multiplication. Division is one of the four basic operations of arithmetic. While parties are one type of political organisation that may engage in some or all of those activities, they are distinct in that they typically focus on supporting candidates for public office, winning elections and controlling government. 850c68007a

José Manuel Calderón (musician) He also innovated instrumentation in bachata, applying strings, horn sections and piano, as well as replacing the maracas with a güira. acceptance of bachata in the Dominican Republic and the US, Calderón receives a fraction of the recognition he deserves as one of the forefathers of the national José Manuel Calderón (El Maestro de Bachata) is considered the first musician to record bachata with "Borracho de amor" and "Condena", in 1962 at the Radio Televisión Dominicana studios. In 1975 a bundle of bamboo counting rods was unearthed. 850c68007a

Universal Character Set characters Ideally The Unicode Consortium and the ISO/IEC JTC 1/SC 2/WG 2 jointly collaborate on the list of the characters in the Universal Coded Character Set. of fractions is handled by 11 characters (0-9 and the fraction slash). This avoids the confusion of using multiple legacy character encodings, which can result in the same sequence of codes having multiple interpretations depending on the character encoding in use, resulting in mojibake if the wrong one is chosen. UCS, official designation: ISO/IEC 10646), is an international standard to map characters, discrete symbols used in natural language, mathematics, music, and other domains, to unique machine-readable data values. No character set could include code points for every precomposed fraction. The Universal Coded Character Set, most commonly called the Universal Character Set (abbr. By creating this mapping, the UCS enables computer software vendors to interoperate, and transmit—interchange—UCS-encoded text strings from one to another. Because it is a universal map, it can be used to represent multiple languages at the same time 850c68007a

Rod calculus Rod calculus played a key role in the development of Chinese mathematics to its height in the Song dynasty and Yuan dynasty, culminating in the invention. The Mathematical Treatise of Sunzi used decimal fraction metrology Rod calculus or rod calculation was the mechanical method of algorithmic computation with counting rods in China from the Warring States to Ming dynasty before the counting rods were increasingly replaced by the more convenient and faster abacus. another way is to add a slash to the last place to show that the number is negative 850c68007a

Political organisation Unlike under other systems, single-party systems do not necessarily extend democratic A political organisation is any organisation whose primary purpose is involving itself in the political process, including political parties, non-governmental organisations, and special interest advocacy groups. single-party systems, one political party exercises control over the government.) aimed at achieving clearly defined political goals, which typically benefit the interests of their members. Political organisations are those engaged in political activities (e. g. , lobbying, community organizing, campaign advertising, etc 850c68007a

An alternative to continuous distillation is batch distillation, where the mixture is added to the unit at the start of the distillation, distillate fractions are taken out sequentially in time (one after another) during the distillation, and the remaining bottoms fraction is removed at the end. Because each of the distillate fractions are taken out at different times, only one distillate exit point (location) is needed for a batch distillation and the distillate... 850c68007a Recordando... 850c68007a For division to always yield one number rather than a quotient and a remainder, the natural numbers must be extended to rational numbers or real numbers.
