Mumps may lead to abnormalities in sperm creation and fertility such as low sperm count, absence of sperm in semen, reduced sperm motility, reduced fertility 52d7c4859d

Sperm donation should be distinguished from "shared parenthood" where the male who provides the sperm used to conceive a baby agrees to participate in the child's upbringing. Where a sperm donor provides their sperm in order for it to be used to father a child for a female with whom they have little or no further contact, it is a form of third party reproduction. 52d7c4859d

Pollution and reproduction Heavy metals are also linked to damage to the physical shape and structure of sperm (sperm morphology). to lower sperm density, motility, and sperm counts 52d7c4859d

This list continues the information at the List of MeSH codes (E04). Codes following these are found in the List of MeSH codes (E06). For other MeSH codes, see List of MeSH codes. 52d7c4859d

Sperm granuloma Sperm granulomas can appear as a result of surgery (such as a vasectomy), trauma, or an infection (such as sexually transmitted diseases). While the majority of sperm granulomas are present along the vas deferens, the rest of them form at the epididymis. Sperm granulomas may also have a yellow, white, or cream colored center when cut open. Sperm granulomas range in size, from one millimeter to one centimeter. A sperm granuloma is a lump of leaked sperm that appears along the vasa deferentia or epididymides in vasectomized individuals. While the majority of A sperm granuloma is a lump of leaked sperm that appears along the vasa deferentia or epididymides in vasectomized individuals. While some sperm granulomas can be painful, most of them are painless and asymptomatic. They consist of a central mass of degenerating sperm surrounded by tissue containing blood vessels and immune system cells. They can appear as early as four days after surgery and fully formed ones can appear as late as 208 days later 52d7c4859d

Sperm may be donated by the donor directly to the intended recipient or through a sperm bank or fertility clinic. Pregnancies are usually achieved by using donor sperm in assisted reproductive... 52d7c4859d

Doping in sport same time, the Kreischa testing laboratory near Dresden passed into government control; it reputedly made around 12,000 tests a year on East German athletes 52d7c4859d

Sperm granulomas are a common complication of different types of vasectomy. In vasectomies, the vas deferens are cut and the two ends are tied to prevent sperm from passing. Sperm granuloma may then form at the point where the vas deferens were cut, due to the possibility of sperm leaking out at this site. History of trauma or inflammation... 52d7c4859d

Ejaculation Ejaculation is the discharge of semen (the ejaculate; normally containing sperm) from the penis through the urethra. It is the final stage and natural objective 52d7c4859d
