

How To Remove Pregnancy

Crisis pregnancy center A crisis pregnancy center (CPC), sometimes called a pregnancy resource center (PRC) or a pro-life pregnancy center, is a type of nonprofit organization A crisis pregnancy center (CPC), sometimes called a pregnancy resource center (PRC) or a pro-life pregnancy center, is a type of nonprofit organization established by anti-abortion groups primarily to persuade pregnant women not to have an abortion 74473f8660

CPCs have frequently been found to disseminate false medical information about the supposed physical and mental health risks of abortion. They sometimes promulgate misinformation about the effectiveness of condoms and prevention of sexually transmitted infections. CPCs are sometimes called fake abortion clinics by scholars, the media, and supporters of abortion rights due to deceptive advertising that obscures the centers' anti-abortion agenda. 74473f8660 == Signs and symptoms == 74473f8660 Drugs taken in pregnancy including over-the counter-medications, prescription medications, nutritional supplements, recreational drugs, and illicit drugs may cause harm to the mother or the unborn child. Tobacco, alcohol, marijuana, and illicit drug use while pregnant may be dangerous for the unborn baby and may lead to severe... 74473f8660

Drugs in pregnancy Of those who bear children, recreational drug use can have serious consequences to the health of not only the mother, but also the fetus as many medications can cross the placenta and reach the fetus. In addition a reported 5-10% of women of childbearing age use alcohol or other addictive substances. effectiveness of medications to pregnant and lactating women. The Food and Drug Administration (FDA) in the United States reports that there are six million pregnancies with at least 50% of the women taking at least one medication. This ruling has removed the requirement of stating pregnancy categories in prescription drug Drugs, including medications and recreational drugs, may have effects during pregnancy on the pregnant woman and fetus that vary from the effects of the drug on people who are not pregnant. Some of the consequences on the babies include physical and mental abnormalities, higher risk of stillbirth, neonatal abstinence syndrome (NAS), sudden infant death syndrome (SIDS), low birthweight, and others 74473f8660

Complications of pregnancy Complications that occur primarily during childbirth are Complications of pregnancy are health problems that are related to or arise during pregnancy. While some complications improve or are fully resolved after pregnancy, some may lead to lasting effects, morbidity, or in the most severe cases, maternal or fetal mortality. Complications that occur primarily during childbirth are termed obstetric labor complications, and problems that occur primarily after childbirth are termed puerperal disorders. Complications of pregnancy are health problems that are related to or arise

during pregnancy 74473f8660

Severe complications of pregnancy, childbirth, and the puerperium are present in 1.6% of mothers in the US, and in 1.5% of mothers in Canada. In the immediate postpartum period (puerperium), 87% to 94% of women report at least one health problem. Long-term health problems (persisting after six months postpartum) are reported by 31% of women. 74473f8660

Abdominal pregnancy pregnancies are as difficult to diagnose and treat as abdominal pregnancies, their exclusion from the most common definition of abdominal pregnancy has An abdominal pregnancy is a rare type of ectopic pregnancy where the embryo or fetus is growing and developing outside the uterus, in the abdomen, and not in a fallopian tube (usual location), an ovary, or the broad ligament 74473f8660

Male pregnancy Most species that reproduce by sexual Male pregnancy is the incubation of one or more embryos or fetuses by organisms of the male sex in some species. Male pregnancy is the incubation of one or more embryos or fetuses by organisms of the male sex in some species. Most species that reproduce by sexual reproduction are heterogamous—females producing larger gametes (ova) and males producing smaller gametes (sperm). In nearly all animal species that give live birth, offspring are carried by the female until birth, but in fish of the family Syngnathidae (pipefish, seahorses and the leafy seadragon), males perform that function 74473f8660

Rape can cause difficulties during and after pregnancy, with potential negative consequences for both the victim and a resulting child. Medical treatment following a rape includes testing for, preventing, and managing pregnancy. A woman who becomes pregnant after a rape may face a decision about whether to have an abortion, to raise the child, or to make an adoption plan. In some countries where abortion is illegal after rape and incest, over 90% of pregnancies in girls age 15 and under are due to rape by family members. 74473f8660

Ectopic pregnancy This complication has also been referred to as an extrauterine Ectopic pregnancy is a complication of pregnancy in which the embryo attaches outside the uterus. This complication has also been referred to as an extrauterine pregnancy (a. Ectopic pregnancy is a complication of pregnancy in which the embryo attaches outside the uterus. EUP). a. Pain may also spread to the shoulder if bleeding into the abdomen has occurred. Signs and symptoms classically include abdominal pain and vaginal bleeding, but fewer than 50 percent of affected women have both of these symptoms. The pain may be described as sharp, dull, or crampy. k. Severe bleeding may result in a fast heart rate, fainting, or shock. With very rare exceptions, the fetus is unable to survive 74473f8660

Many CPCs are run by Christian groups that adhere to a socially... 74473f8660
Pregnancy options counselors educate women about the different options that are

available and help guide them to a decision on how to proceed with their pregnancy. The options include abortion, adoption, or parenting. The job of a pregnancy options counselor is to neither encourage nor discourage a woman's particular decision, nor do they profit from the woman's choice. Rather, they present unbiased information about each of the options non-judgmentally, then help the woman explore her feelings and come to a decision that fits her best based on her values, culture, future plans, etc. Pregnancy options counseling centers differ from crisis pregnancy centers.... 74473f8660 In a heterotopic pregnancy there is one fertilized ovum which implants normally in the uterus, and one fertilized ovum which implants abnormally, outside of the uterus. 74473f8660 Overall, ectopic pregnancies annually affect less than 2% of pregnancies worldwide. Risk factors for ectopic pregnancy include pelvic inflammatory disease, often due to chlamydia infection; tobacco smoking; endometriosis; prior tubal surgery; a history of infertility; and the use of assisted reproductive technology. Those who have previously had an ectopic pregnancy are at much higher risk of having another one. Most ectopic pregnancies (90%) occur in the fallopian tube, which are known as tubal pregnancies, but implantation can also occur on the cervix, ovaries, caesarean scar, or within the abdomen... 74473f8660 Others—in the minority—are of the view that abdominal pregnancy should be defined by a placenta implanted into the peritoneum. 74473f8660 Sexual activity without the use of effective contraception through choice or coercion is the predominant cause of unintended pregnancy. Worldwide, the unintended pregnancy rate is approximately 45% of all pregnancies (for a total of 120 million unintended pregnancies annually), but rates vary in different geographic areas and among different sociodemographic groups. Unintended pregnancies may be unwanted pregnancies or mistimed pregnancies. While unintended pregnancies are the main reason for induced abortions, unintended pregnancies may also result in other outcomes, such as live births or miscarriages. 74473f8660 == Definitions == 74473f8660

Unintended pregnancy Research on unintended pregnancy rates is challenging, as categorizing a pregnancy as “intended” An unintended pregnancy is a pregnancy that is mistimed or unwanted at the time of conception, also known as an unplanned pregnancy. counseling and removing barriers to contraception access 74473f8660

The false belief that pregnancy can almost never result from rape was widespread for centuries. In Europe, from medieval times well into the 18th century, a man could use a woman's pregnancy as a legal defense... 74473f8660 == In animals == 74473f8660 Common complications of pregnancy include anemia, gestational diabetes, infections, gestational hypertension, and pre-eclampsia. Presence of these types of complications can have implications on monitoring lab work, imaging, and medical management during pregnancy. 74473f8660 In the United States, there are an estimated 2,500 to 4,000 CPCs that qualify as clinics and may also provide pregnancy testing, medical ultrasounds, and other services. Many others operate without medical licensing under varying degrees of regulation. For comparison, there were 807 abortion clinics in the United States as of 2020. Hundreds more CPCs operate outside of the U.S., including in Canada, Latin

America, Africa, and Europe. 74473f8660 The most common site of the extrauterine pregnancy is the fallopian tube. However, other sites of implantation include the cervix, ovary, and abdomen. 74473f8660 Because tubal, ovarian and broad ligament pregnancies are as difficult to diagnose and treat as abdominal pregnancies, their exclusion from the most common definition of abdominal pregnancy has been debated. 74473f8660 == Cause == 74473f8660

Heterotopic pregnancy It may also be referred to as a combined ectopic pregnancy, multiple-sited pregnancy, or coincident pregnancy. referred to as a combined ectopic pregnancy, multiple-sited pregnancy, or coincident pregnancy. The most common site of the extrauterine pregnancy is the A heterotopic pregnancy is a complication of pregnancy in which both extrauterine (ectopic) pregnancy and intrauterine pregnancy occur simultaneously 74473f8660

Pregnancy from rape The scientific consensus is that rape is at least as likely to lead to pregnancy as consensual sexual intercourse, with some studies suggesting rape may actually result in higher rates of pregnancy than consensual intercourse. It has been studied in the context of war, particularly as a tool for genocide, as well as in other unrelated contexts, such as rape by a stranger, statutory rape, incest, and underage pregnancy. statutory rape, incest, and underage pregnancy. The scientific consensus is that rape is at least as likely to lead to pregnancy as consensual sexual intercourse Pregnancy is a potential result of rape 74473f8660

Research on unintended pregnancy rates is challenging, as categorizing a pregnancy as "intended" or "unintended" does... 74473f8660

Pregnancy options counseling Limited access to birth control and family planning resources, as well as misuse of birth control are some of the major contributing factors to unintended pregnancies around the world. Pregnancy options counselors educate women about the different options that are available and help guide them to a decision on how to proceed Pregnancy options counseling is a form of counseling that provides information and support regarding pregnancy. million pregnancies. In 2012, the global rate of unintended pregnancies was estimated to be 40 percent, or eighty-five million pregnancies. Women seeking pregnancy options counseling are typically doing so in the case of an unplanned or unintended pregnancy 74473f8660

Unintended pregnancy has been linked to numerous poor maternal and child health outcomes, regardless of the outcome of the pregnancy. Efforts to decrease rates of unintended pregnancy have focused on improving access to effective contraception through improved counseling and removing barriers to contraception access. 74473f8660 Symptoms may include abdominal pain or vaginal bleeding during pregnancy. As this is nonspecific in areas where ultrasound is not available the diagnosis was often only discovered during surgery to investigate the abnormal symptoms. They are typically diagnosed later in the developing world than the developed. In about half of cases from a

center in the developing world the diagnosis was initially missed. 74473f8660 It is a dangerous condition as there can be bleeding into the abdomen that results in low blood pressure and can be fatal. Other causes of death in women with an abdominal pregnancy include anemia, pulmonary... 74473f8660 In 2016, complications of pregnancy, childbirth, and the puerperium resulted in 230,600 deaths globally, down from 377,000 deaths in 1990. The most... 74473f8660 Although heterotopic pregnancies were once thought to be a rare phenomenon, the incidence has increased due to the increasing use of assisted reproductive technologies. 74473f8660
