There are also free or costless implementations, such as GNU Data Language (GDL) and Fawltly Language (FL). In this case IDL, short for Interactive Data Language, is a programming language used for data analysis. writes files in the IDL Save/Restore format must have a license from NV5 Geospatial Solutions, Inc. IDL shares a common syntax with PV-Wave and originated from the same codebase, though the languages have subsequently diverged in detail 95114259e2

As of 2020, MATLAB has more than four million users worldwide. They come from various backgrounds of engineering, science, and economics. As of 2025, more than 6,500 global colleges and universities use MATLAB to support instruction and research. 95114259e2 == Archive and compressed == 95114259e2 The use of file name extension varies by operating system and file system. Some older file systems, such as File Allocation Table (FAT), limited an extension to 3 characters, but modern systems do not. Microsoft operating systems (i.e. MS-DOS and Windows) depend more on the extension to associate contextual and semantic meaning to a file than Unix-based systems. 95114259e2 IDL is vectorized, numerical, and interactive, and is commonly used for interactive processing of large amounts of data (including image processing). The syntax includes many constructs from Fortran and some from C. 95114259e2 == History == 95114259e2
