== Background == d804a14748 Announced in 2018, the game was originally developed on a much smaller budget compared to previous Digimon games. However, as development progressed, producer Kazumasa Habu realized that their original budget and smaller studio was inadequate to achieve his vision, resulting in the game being re-developed from scratch and switched to a different game engine. This, along with the impact of the COVID-19 pandemic, resulted in the game being delayed from a previously announced 2019 release date. d804a14748 Although symptoms vary based on which side of the heart is affected, HF typically presents with shortness of breath, excessive fatigue, and bilateral leg swelling. The severity of the heart failure is mainly decided based on ejection fraction and also measured by the severity of symptoms. Other conditions that have symptoms similar to heart failure include obesity, kidney failure, liver disease, anemia, and thyroid disease. d804a14748

In the Late Cretaceous Period, a female *Maiasaura* finds an egg and adopts it as her own. She takes it to her nest near Egg Mountain, a volcano with a giant egg shaped rock. One day, a marauding pack of *Troodon* attack the nesting grounds, snatching and eating the *Maiasaura* eggs. The mother loses all but two of her eggs, one of which being the egg she saved. When the eggs hatch, one is a male *Maiasaura*, whom the mother names Light, and the other is a *Tyrannosaurus*, named Heart. The herd leader plans to kill Heart in order to prevent him from eating anyone when he gets older, but the mother *Maiasaura* stops him, arguing that he is a newborn and harmless. The leader gives her the chance to leave him in the wild, but she feels guilty about abandoning Heart and decides to leave the herd and raise her children by herself. d804a14748 Two Dutch tourists are murdered while skinny-dipping in Indian Lake near the small town of Proofrock, Idaho. One of their phones remains in their canoe, unnoticed. Indian Lake is an artificial reservoir; the remains of a Christian settlement, including a church, lie beneath its surface. Local legend tells the story of Stacey Graves, a young Indian girl who was accused of witchcraft. Stacey cannot enter the waters of the lake because it is a Christian burial ground. Indian Lake abuts a national forest, which is being developed into a new neighborhood called Terra Nova by a group of wealthy businesspeople. d804a14748 In humans, the heart is divided into four chambers: upper left and right atria and lower left and right ventricles. Commonly, the right atrium and ventricle are referred together as the right heart and their left counterparts as the left heart.

In a healthy heart, blood flows one way through the heart due to heart valves, which prevent backflow. The heart is enclosed in a protective sac, the pericardium, which also contains a small amount of fluid. The wall of the heart is made up of three layers: epicardium, myocardium, and endocardium. d804a14748

Heart failure failure include coronary artery disease, heart attack, high blood pressure, atrial fibrillation, valvular heart disease, excessive alcohol consumption, Heart failure (HF), also known as congestive heart failure (CHF), is a syndrome caused by an impairment in the heart's ability to fill with and pump blood d804a14748

== Plot == d804a14748 The human heart contains four valves: tricuspid valve, pulmonary valve, mitral valve and aortic valve. Their main purpose is to keep blood flowing in the proper direction through the heart, and from the heart into the major blood vessels connected to it (the pulmonary artery and the aorta). Heart valves can malfunction for a variety of reasons, which can impede the flow of blood through the valve (stenosis) and/or let blood flow backwards through the valve (regurgitation). Both processes put strain on the heart and may lead to serious problems, including heart failure. While some dysfunctional valves can be treated with drugs or repaired, others need to be replaced with an artificial valve. d804a14748 The heart pumps blood with a rhythm determined by a group of pacemaker cells in the sinoatrial node. These generate an electric current that causes the heart to contract, traveling through... d804a14748
