Vasectomy During the procedure, the vasa deferentia are cut and tied or sealed so as to prevent sperm from entering into the urethra and thereby prevent fertilization of ova through sexual intercourse. Vasectomy is an elective surgical procedure that results in male sterilization, often as a means of permanent contraception. Hospitalization is not normally required as the procedure is not complicated, the incisions are small, and the necessary equipment routine. Vasectomies are usually performed in a physician's office, medical clinic, or, when performed on a non-human animal, in a veterinary clinic.
