

Do You Floss Or Brush First

Electric toothbrushes can be classified according to the frequency of their movements as power, sonic, or ultrasonic toothbrushes, depending on whether they make movements below, in, or above the audible range, respectively. 1daa839f8e Many later models incorporate features like timers, pressure sensors with multiple cleaning modes, WiFi and Bluetooth. 1daa839f8e

Electric toothbrush Electric toothbrushes can be classified according to the frequency of their movements as power, sonic, or ultrasonic toothbrushes An electric toothbrush is a toothbrush which automatically creates rapid bristle movements using oscillation motions to imitate hand brushing. to imitate hand brushing 1daa839f8e

By 1949, he discovered that thin, round-ended, nylon filaments would be gentle on the gums yet effective for cleaning teeth. 1daa839f8e == History == 1daa839f8e Professional tooth cleaning refers to treatment that is conducted by dental professionals like the dental hygienist, therapist, and dentist. Processes like scaling and prophylaxis aim to remove plaque, calculus, and stain that cannot be removed through routine home care. 1daa839f8e == History == 1daa839f8e == History == 1daa839f8e

Tooth brushing Tooth brushing is the act of scrubbing teeth with a toothbrush equipped with toothpaste. Interdental cleaning (with floss or an interdental brush) can Tooth brushing is the act of scrubbing teeth with a toothbrush equipped with toothpaste. Interdental cleaning (with floss or an interdental brush) can be useful with tooth brushing, and together these two activities are the primary means of cleaning teeth, one of the main aspects of oral hygiene. The recommended amount of time for tooth brushing is two minutes each time for two times a day 1daa839f8e

Interdental cleaning This is to remove the dental plaque in areas a toothbrush cannot reach. dexterity or compliance, waterjet irrigators and interdental brushes were found to be significantly more effective than flossing. The ultimate goal of interproximal cleaning is to prevent the development of interproximal caries and periodontal disease. The combined use of tooth brushing and mechanical and manual interdental cleaning devices has been proven to reduce the prevalence of caries and periodontal diseases. Interdental brushes commonly Interdental cleaning or interproximal cleaning is part of oral hygiene where the aim is to clean the areas in between the teeth, otherwise known as the proximal surfaces of teeth 1daa839f8e

In 1982, a station aired his art class as a pilot, and several PBS stations signed up for The Joy of Painting soon after. One such station, WIPB, employed him to host the show in Muncie, Indiana beginning in 1983. The show features him instructing viewers on how to create landscape art using the quick, wet-on-wet oil painting technique with a limited palette. It ran until 1994... 1daa839f8e In 1958, he was granted a utility patent for a "mouthbrush" having fine, soft, flat-ended nylon bristles,

and a similar appearance to the 1950 design. He claimed in his application that the brush was less abrasive to tooth enamel, more effective at massaging the gums, and better at picking up tooth powder than other brushes available at the time, which featured coarse, angle-cut bristles. The... Robert W. Hutson (1919–2001), owner of a periodontal practice in San Jose, began designing a toothbrush in the 1940s.

Bob Ross "What Happened to Bob Ross? Paintings. The Joy of Painting with Bob Ross: Meadow Robert Norman Ross (October 29, 1942 – July 4, 1995) was an American painter and art instructor who created and hosted The Joy of Painting, an instructional television program that aired from 1983 to 1994 on PBS in the United States and CBC in Canada. ". Mental Floss. Retrieved December 30, 2017. Lucas (July 16, 2012)

Teeth cleaning This may be done with dental floss or interdental Teeth cleaning is part of oral hygiene and involves the removal of dental plaque from teeth with the intention of preventing cavities (dental caries), gingivitis, and periodontal disease. addition to brushing, cleaning between teeth may help to prevent build-up of plaque bacteria on the teeth

Hutson patented a toothbrush in 1950. The application for a design patent for his "Hutson toothbrush" was filed on January 13, 1950, and U.S. Design Patent No. 160,604 was granted on October 24 the same year. Floss == Brushing, scrubbing and flossing == Use of floss is recommended to prevent gingivitis and the build-up of plaque. The American Dental Association claims that up to 80% of plaque can be removed by flossing, and it may confer a particular benefit in individuals with orthodontic devices. However, empirical scientific evidence demonstrating the clinical benefit of flossing as an adjunct to routine tooth brushing alone remains limited. Since many common toothpaste ingredients are harmful if swallowed in large amounts, toothpaste should be spat out. Brushing teeth is most often done at a sink in a bathroom or kitchen, where the toothbrush is rinsed afterwards to remove any debris remaining and then dried to reduce conditions ideal for bacterial growth (and, if it is a wooden toothbrush, mold as well). People routinely clean their own teeth by brushing and interdental cleaning, and dental hygienists can remove hardened deposits (tartar) not removed by routine cleaning. Those with dentures and natural teeth may supplement their cleaning with a denture cleaner. Burst works with dental professionals to develop oral care products. As of January 2020, the company recruited roughly 25,000 dentists and dental hygienists in the United States to champion their merchandise in the United States in exchange for compensation. The subscription model allows users to purchase products online, or through a dental professional, and gives them a refill every three months. Hamish Khayat partnered with Brittany Stewart to build a direct-to-consumer company with a subscription-based business model. The company initially offered electric toothbrushes and later expanded to tooth whitening strips, toothpaste and dental floss. History ==

Burst Oral Care "BURST Oral Care launches first black expanding floss with Burst is an American brand of toothpaste and other oral hygiene products made by the e-commerce company Burst Oral Care. It makes electric toothbrushes, dental floss, and tooth whitening strips. Wired. The company was co-founded in 2017 by Hamish Khayat and Brittany Stewart in California. "Don't Brush Off Mouth Tech As a Passing Fad". Retrieved 12 August 2020. 24 January 2020

Dental floss " He considered this the most important part of oral care. Its regular use as part of oral cleaning is intended to maintain oral health. matter which no brush can remove and which is the real source of disease. Floss was not commercially Dental floss is a cord of thin filaments, typically made of nylon or silk, used in interdental cleaning to remove food and dental plaque from between teeth or places a toothbrush has difficulty reaching or is unable to reach 1daa839f8e

Cotton Candy grapes ABC News. "Cotton candy grapes that taste like fairy floss hit Australian supermarkets",. The grapes were first commercially grown in California by grower Grapery, which began selling them in 2011. Archived from the original on 2018-03-14 Cotton Candy is the trademark for a variety of sweet white table grapes of the cultivar IFG Seven whose flavour has been compared to cotton candy. Lloyd, Shelley (2018-03-14). The grapes were developed by horticulturist David Cain and his team at Bakersfield, California-based fruit breeder International Fruit Genetics (IFG) 1daa839f8e

David Cain was a fruit geneticist and former USDA researcher who co-founded IFG in Bakersfield in 2001. A few months after forming the company, he attended a trade show where researchers from the University of Arkansas were showing grapes. One was a purple Concord grape that tasted sweet like cotton candy, but was fragile with tiny seeds. He licensed that grape and began working to improve the size and texture by crossbreeding the grapes with sturdier California grapes. He hand pollinated to cross pollinate millions of grapes to combine the sweet Concord grapes with common grapes in order to make them firmer. Pollen from male grape flowers was extracted and brushed onto the female clusters of the target plant. Over twelve years, a hundred thousand plants were created... 1daa839f8e Some toothbrushes have plant-based handles, often made of bamboo. However, most are made of cheap plastic; such brushes constitute a significant source of pollution. Over 1 billion toothbrushes are discarded into landfills... 1daa839f8e Born in Daytona Beach, Florida, Ross joined the United States Air Force in 1961, rising to the rank of master sergeant. During his time at the military, he developed a passion for oil painting. He studied the art from Bill Alexander's show The Magic of Oil Painting, and eventually his income from painting outgrew his military salary. Retiring from the Air Force in 1981, he was discovered by Annette Kowalski, who had attended one of his sessions while he was working as a tutor. She and her husband helped Ross pool together money to set up a new company: Bob Ross Inc. 1daa839f8e Home care teeth cleaning refers to the daily oral hygiene habits practised by patients. It can be performed by tooth brushing and interdental cleaning, to disrupt the maturation of dental plaque to calculus (tartar). 1daa839f8e

Toothbrush They should be used in conjunction with tools that clean between the teeth—where toothbrush bristles cannot reach—such as floss, tape, interdental brushes or toothpicks. It consists of a head of tightly clustered bristles, onto which toothpaste is applied, mounted on a handle that facilitates cleaning hard-to-reach areas of the mouth. Toothbrushes are available in different bristle A toothbrush is a special type of brush used to clean the teeth, gums, and tongue. the teeth—where toothbrush bristles cannot reach—such as floss, tape, interdental brushes or toothpicks 1daa839f8e

Oral-B In order to create demand for new brushes, the Oral-B is an American brand of oral hygiene products currently owned by Procter & Gamble. Oral-B has market availability in 150-170 countries. The brand was launched in 1950 in California by Robert W. Hutson, who was a pioneer of modern toothbrushes. The partners placed a \$10,000 order for brushes and hired the first two salespeople. Owens Brush Company. Its products include toothpastes, toothbrushes, electric toothbrushes, and mouthwashes 1daa839f8e

An electric motor is used to produce motions at sonic speeds or below. A piezoelectric crystal is used for ultrasonic motions in ultrasonic toothbrushes. Later model electric toothbrushes are typically using an alternating current (AC) power cord to deliver power to a charging base that charges a direct current (DC) rechargeable battery using inductive charging technology, or it's a standalone unit powered by insertable standard size batteries like AA or AAA. 1daa839f8e In May 2020, Burst Oral Care raised a Series C funding round, led by GS Growth, Goldman Sachs' growth equity platform, to support their ongoing growth and extension of their product line. The investment follows a total of \$20 million of funding from... 1daa839f8e The earliest example of an electric toothbrush was produced by Tomlinson Moseley. Sold as the Motodent, a patent was filed by his company, Motodent Inc. on December 13, 1937. In Switzerland in 1954, Dr. Philippe-Guy Woog invented the Broxodent... 1daa839f8e Toothbrushes are available in different bristle textures, sizes, and forms. Most dentists recommend using soft-bristled toothbrushes, as harder ones may damage tooth enamel or irritate the gums. 1daa839f8e
