BLUF (communication) It differs from an abstract or executive summary in that it is simpler and more concise, similar to a thesis statement, and it resembles the inverted pyramid practice in journalism and the so-called “deductive” presentation of information, in which conclusions precede the material that justifies them, in contrast to “inductive” presentation, which lays out arguments before the conclusions drawn from them. By extension, that information is also called a BLUF. This provides the reader with the most important information first. Archived (PDF) from the original on 2021-01-10. 2023-03-07. ISO 8601 countries with different conventions for writing numeric dates and times. The standard provides a well-defined,

unambiguous method of representing calendar dates and times in worldwide communications, especially to avoid misinterpreting numeric dates and times when such data is transferred between countries with different conventions for writing numeric dates and times. It is maintained by the International Organization for Standardization (ISO) and was first published in 1988, with updates in 1991, 2000, 2004, and 2019, and an amendment in 2022. ISO 8601 applies to these representations and formats: dates, in the Gregorian calendar ISO 8601 is an international standard covering the worldwide exchange and communication of date and time-related data

This format was originally created in 1989 and was first implemented in PKWARE, Inc.'s PKZIP utility, as a replacement for the previous ARC compression format by Thom Henderson. The ZIP format was then quickly supported by many software utilities other than PKZIP. The ZIP format is natively supported on major operating systems (e.g. Android, ChromeOS, iOS, Linux, macOS, and Windows). It is typically built into an operating system's file management application.

Archive and compressed == History == Bottom Line Up Front is a standard in U.S. military communication whose aim is to make military messages precise and lucid. It differs from an older, more-traditional style in which conclusions and recommendations are included at the end, following the arguments and considerations of facts. The BLUF concept is not exclusive to writing since it can also be used in conversations and interviews.

Formats available include, but are not limited to: ZIP files generally use the file extensions .zip or .ZIP and the MIME media type application/zip. ZIP is used as a base file format by many programs, usually under a different name. When navigating a file system via a user interface, graphical icons representing ZIP files often appear as a document or other object prominently featuring a zipper.

Each format is identified by a phrase that is the format's full or abbreviated name. The typical file name extension used for a format is included in parentheses if it differs from the identifier, ignoring case.

Click-through rates for ad campaigns vary tremendously. The first online display ad, shown for AT&T on the website HotWired in 1994, had a 44% click-through rate. With time, the overall rate of user's clicks on webpage banner ads has decreased.

Mail Continued The mail, or post, is a system for physically transporting postcards, letters, and parcels. Proof of payment is usually in the form of an adhesive postage stamp, but a postage meter is also used for bulk mailing. Since the mid-19th century, national postal systems have generally been established as a government monopoly, with a fee on the article prepaid. A postal service can be private or public, though many governments place restrictions on private systems.

Developers were likewise stymied by the complex system, and since the installed base was so small their potential sales were even smaller. In 1996, Apple Computer quietly dropped its efforts to market AOCE, and the project quickly disappeared. 2abcaeccf1

Click-through rate It is commonly used to measure the success of an online advertising campaign for a particular website Click-through rate (CTR) is the ratio of clicks on a specific link to the number of times a page, email, or advertisement is shown. == Overview == 2abcaeccf1 Postal authorities often have functions aside from transporting letters. In some countries, a postal, telegraph and telephone (PTT) service oversees the postal system, in addition to telephone and telegraph systems. Some countries' postal systems allow for savings accounts and handle applications for passports. 2abcaeccf1 == Etymology == 2abcaeccf1 The EPUB format is the most widely supported e-book format, supported by most e-book readers, including Kobo eReader devices, Amazon Kindle devices being an exception. Most e-book readers also support the PDF and plain text formats. E-book software, like the cross-platform Calibre, can be used to convert e-books from one format to another, as well as to create, edit and publish e-books. 2abcaeccf1 ISO 8601 applies to these representations and formats: dates, in the Gregorian calendar (including the proleptic Gregorian calendar); times, based on the 24-hour timekeeping system, with optional UTC offset, time intervals, and combinations thereof. The standard does not assign specific meaning to any element of the dates/times represented: the meaning of any element depends on the context of its use. Dates and times represented cannot use words that do not have a specified numerical meaning within the standard (thus excluding names of years in the Chinese calendar), or that do not use computer characters... 2abcaeccf1 The use of file name extension varies by operating system and file system. Some older file systems, such as File Allocation Table (FAT), limited an extension to 3 characters, but modern systems do not. Microsoft operating systems (i.e. MS-DOS and Windows) depend more on the extension to associate contextual and semantic meaning to a file than Unix-based systems. 2abcaeccf1

The purpose of click-through rates is to measure the ratio of clicks to impressions of an online ad or email marketing campaign. Generally, the higher the CTR, the more effective the marketing campaign has been at bringing people to a website. Most commercial websites are designed to elicit some sort of action, whether it be to buy a book, read a news article, watch a music video, or search for a flight. People rarely visit websites with the intention of viewing advertisements, in the same way that few people watch television to view the commercials.
