

Turmeric Benefits For Skin

== Use == 5cefd75804 Efforts to lighten the skin date back to at least the 16th century in Asia. While a number of agents — such as kojic acid and alpha hydroxy acid — are allowed in cosmetics in Europe, a number of others such as hydroquinone and tretinoin are not. While some countries do not allow mercury compounds in cosmetics, others still do, and they can be purchased online. 5cefd75804 == Etymology == 5cefd75804

Biopiracy active ingredient of turmeric powder, to create drugs used for wound healing without directly crediting Indian communities, where turmeric was traditionally Biopiracy is the unauthorized appropriation of knowledge and genetic resources of farming and indigenous communities by individuals or institutions seeking exclusive monopoly control through patents or intellectual property. While bioprospecting is the act of exploring natural resources for undiscovered chemical compounds with medicinal or anti-microbial properties, commercial success from bioprospecting leads to the company's attempt at protecting their intellectual property rights on indigenous medicinal plants, seeds, genetic resources, and traditional medicines 5cefd75804

Cayenne is used in cooking spicy dishes either as a powder or in its whole form. It is also used as a herbal supplement, due to its active compound, capsaicin. They are also nutritious and they are especially rich in provitamin A, carotenoids and vitamin C. 5cefd75804 Areas of increased... 5cefd75804 English botanist Nicholas Culpeper used... 5cefd75804 Cooking ginger transforms gingerol via a reverse aldol reaction into zingerone, which is less pungent and has a spicy-sweet aroma. When ginger is dried or mildly heated, gingerol undergoes a dehydration reaction forming shogaols, which are about twice as pungent as gingerol. This is why dried ginger is more pungent than fresh ginger. 5cefd75804

Natural skin care These substances may be combined with various carrier agents, preservatives, surfactants, humectants and emulsifiers. Much of the recent literature reviews plant-derived ingredients, which may include herbs, roots, flowers and essential oils, but natural substances in skin care products include animal-derived products such as beeswax, and minerals. determine to confirm and elucidate the benefits of these ingredients in the prevention and management of skin disease. " An assessment of clinical trials Natural skin care uses topical creams and lotions made of ingredients available in nature 5cefd75804

Skin whitening reinforcement of these narratives. Turmeric was a used ingredient in lightening skin tone complexion to be seen as desirable. This includes mercury compounds which may cause neurological problems and kidney problems. Skin lightening is a common practice Skin whitening, also known as skin lightening and skin bleaching, is the practice of using chemical substances in an attempt to lighten the skin or provide an even skin color by reducing the melanin concentration in the skin. Several chemicals have been shown to be effective in skin whitening, while some have proven to be toxic or have questionable safety profiles 5cefd75804

The word cayenne is thought to be a corruption of the word kyynha, meaning "capsicum" in the Old Tupi language once spoken in Brazil. Cayenne, the capital city of French Guiana is related to the name, and may have been named for the pepper or the Cayenne River. 5cefd75804 == Signs and symptoms == 5cefd75804 There are no legal definitions in the U.S. for advertising term "natural" when applied to personal care products. Consumers often express a preference for skin products with organic and natural ingredients. However, the terms "natural" and "organic" are different and should not be used interchangeably. In the United

States, the United States Department of Agriculture (USDA) oversees the National Organic Program (NOP) with strict requirements across ingredient sourcing, production, handling, and documentation; and governs organic claim eligibility. The personal skin care market based on natural products has shown strong growth. Clinical and laboratory studies have identified activities in many natural ingredients that have potential beneficial activities... 5cefd75804 Hot flashes and night sweats are vasomotor symptoms, typically experienced as a feeling of intense heat with sweating and rapid heartbeat, and may typically last from two to thirty minutes for each occurrence, ending just as rapidly as they began. The sensation of heat usually begins in the face or chest, although it may appear elsewhere such as the back of the neck, and it can spread throughout the whole body. Some people feel as if they are going to faint. In addition to being an internal sensation, the surface of the skin, especially on the face, becomes hot to the touch. This is the origin of the alternative term "hot flush", since the sensation of heat is often accompanied by visible reddening of the face. 5cefd75804 The hot-flash event may be repeated a few times... 5cefd75804

Gingerol Many studies have been around the effects of gingerols on a wide range of cancers including leukemia, prostate, breast, skin, ovarian Gingerol ([6]-gingerol) is a phenolic phytochemical compound found in fresh ginger that activates heat receptors on the tongue. regulation for diabetics. This chemical compound is found in all members of the Zingiberaceae family and is high in concentrations in the grains of paradise as well as an African Ginger species. It is normally found as a pungent yellow oil in the ginger rhizome, but can also form a low-melting crystalline solid 5cefd75804

Ginger is in the family Zingiberaceae, which also includes turmeric (*Curcuma longa*), cardamom (*Elettaria cardamomum*), and galangal. Ginger originated in Maritime Southeast Asia and was likely domesticated first by the Austronesian peoples. It was transported with them throughout the Indo-Pacific during the Austronesian expansion (c. 5,000 BP), reaching as far as Hawaii. Ginger is one of the first spices to have been exported from Asia, arriving in Europe with the spice trade, and was used by ancient Greeks and Romans. The distantly related dicots in the genus *Asarum* are commonly called wild ginger because of their similar taste. 5cefd75804

Hot flash yellow/orange polyphenol which is the major constituent of the spice turmeric, and gives turmeric its color. Longer duration vasomotor symptoms are more often called hot flushes. Curcumin has low bioavailability, but coadministration Hot flash is a vasomotor symptom, often caused by the changing hormone levels that are characteristic of menopause. It is typically experienced as a feeling of intense heat with sweating and rapid heartbeat, and may typically last from two to 30 minutes for each occurrence. Hot flashes are the most commonly recognized menopausal symptom 5cefd75804

The rhizomes can be used fresh, but they are often boiled in water and dried, after which they are ground into a deep orange-yellow shelf-stable spice powder commonly used as a coloring and flavoring agent in many Asian cuisines, especially for curries (curry powder). Turmeric powder has a warm, bitter, black pepper-like flavor and earthy, mustard-like aroma. 5cefd75804 The fruits are generally dried and ground to make the powdered spice of the same name. However, cayenne powder may be a blend of different types of peppers, quite often not containing cayenne peppers, and may or may not contain the seeds. 5cefd75804 Although long used in Ayurvedic medicine, there is no high-quality clinical evidence that consuming turmeric or the principal turmeric constituent, curcumin, is effective for treating any disease. Curcumin, a bright yellow chemical produced by the turmeric plant, is approved as a food additive by the World Health Organization, European Union, and United States Food and Drug Administration. Turmeric and its extract... 5cefd75804 Moreover, if biological resources and traditional knowledge are taken

from indigenous or marginalized groups, the commercialization of their natural resource can harm communities. Despite the medicinal and innovative benefits of bioprospecting and biochemical research, the expropriation of indigenous land for their genetic resources without fair compensation inevitably leads to exploitation. Biopiracy can harm indigenous populations in multiple ways. Without proper compensation or reward for traditional knowledge of natural resources, the sudden increase in commercial value of the species producing the active compound can...

Chicken feet After an outer layer of hard skin is removed, most of the edible tissue on the feet consists of skin and tendons, with no muscle. This gives the feet a distinct gelatinous texture different from the rest of the chicken meat. After an outer layer of hard skin is removed, most of the edible tissue on the feet consists of skin and tendons, with no muscle. This gives Chicken feet is cooked and eaten in many countries.

Sindoor is a traditional vermilion-red or orange-red cosmetic powder used by married women within Hindu communities across South Asia. It is applied along the central parting line of the hair, known as the maang, and indicates marital status and auspicious significance. Its first application is performed by the husband during the wedding ritual called sindoor daan and marks the transition from unmarried to married life.

Cayenne pepper Nccmede. Online The cayenne pepper is a type of *Capsicum annum*. It is usually a hot chili pepper used to flavor dishes. May 2023.)". Most varieties are generally rated at 30,000 to 50,000 Scoville units. Retrieved 9 November 2022. "11 Amazing Health Benefits of Cayenne Pepper and Turmeric". Cayenne peppers are a group of tapering, 10 to 25 cm long, generally skinny, mostly red-colored peppers, often with a curved tip and somewhat rippled skin, which hang from the bush as opposed to growing upright. "Cayenne (n. Retrieved 9 November 2017

Sindoor In Hindu communities, the sindoor is considered auspicious and is a visual marker of marital status of a woman and ceasing to wear it usually implies widowhood. This method, rooted Sindoor (Hindi: सिंदूर, IAST: *sindūr*) or sindura (Sanskrit: सिन्दुरा, IAST: *sindūra*) is a traditional vermilion red or orange-red or maroon cosmetic powder from South Asia, usually worn by married women along the part of their hairline. triggers a chemical reaction with turmeric's active compound, curcumin, to produce a bright red pigment safe for skin application

== Around the world == Physiological potential == Ginger has been used in traditional medicine in China, India and Japan for centuries, and as a modern dietary supplement. Ginger may offer...

Ginger The inflorescences bear flowers having pale yellow petals with purple edges, and arise directly from the rhizome on separate shoots. It is an herbaceous perennial that grows annual pseudostems (false stems made of the rolled bases of leaves) about one meter tall, bearing narrow leaf blades. separate shoots. Ginger is in the family Zingiberaceae, which also includes turmeric (*Curcuma longa*), cardamom (*Elettaria cardamomum*), and galangal. Ginger Ginger (*Zingiber officinale*) is a flowering plant whose rhizome, ginger root or ginger, is widely used as a spice and a folk medicine

Turmeric It is a perennial, rhizomatous Turmeric (*Curcuma longa*), is a flowering plant in the ginger family Zingiberaceae. Turmeric (/ˈtʃːrmərɪk, ˈtʃuː-/), or *Curcuma longa* (/ˈkɜːrkjəmə ˈlɒŋɡə/), is a flowering plant in the ginger family Zingiberaceae. It is a perennial, rhizomatous, herbaceous plant native to the Indian subcontinent and Southeast Asia that requires temperatures between 20 and 30 °C

(68 and 86 °F) and high annual rainfall to thrive. Plants are gathered each year for their rhizomes, some for propagation in the following season and some for consumption or dyeing 5cefd75804

The word sindoor is derived from the Sanskrit word *simḍūra*, which refers...

5cefd75804 Traditional sindoor was made with turmeric and alum or lime, or from other herbal ingredients. Unlike red lead and vermilion, these are not poisonous. Some commercial sindoor products contain synthetic ingredients, some of which are not manufactured to proper standards and may contain lead. 5cefd75804 In a pre-clinical meta-analysis of gingerol compounds anticancer, anti-inflammatory, anti-fungal, antioxidant, neuroprotective and gastroprotective properties were reported, which include studies in-vitro and in-vivo. A few in-vivo studies have proposed that gingerols facilitate healthy glucose regulation for diabetics...

5cefd75804 In a number of African countries, above 25% of women regularly use skin-whitening products. In Asia, this number is around 40%. In India, over 50% of skin-care product sales are attributed to skin-lightening formulations. In Pakistan, where skin lightening products are popular, creams have been found to contain toxic levels of hydroquinone and mercury. 5cefd75804 Ginger also contains [8]-gingerol, [10]-gingerol, and [12]-gingerol, collectively deemed gingerols.
