Peak oil relates closely to oil depletion; while petroleum reserves are finite, the key issue is the economic viability of extraction at current prices. Initially, it was believed that oil production would decline due to reserve depletion, but a new theory suggests that reduced oil demand could lower prices, affecting extraction costs. Demand may also decline due to persistent high prices. f5f178522c == Testing == f5f178522c == Music video == f5f178522c

Peak expiratory flow Peak expiratory flow is typically measured in units of liters per minute (L/min). It measures the airflow through the bronchi and thus the degree of obstruction in the airways.
