As of 2026, the Nysa-Polana complex contains over 38,600 known asteroids. The complex is broadly divided into low-albedo and high-albedo populations, each consisting of distinct families named after their largest members. The low-albedo population, sometimes known as the Polana-Eulalia complex, comprises the New Polana and Eulalia families and contains carbonaceous asteroids with spectral

types C, B, and F. The New Polana family formed from an asteroid collision 1.40 ± 0.15 billion years ago, whereas the Eulalia family formed... 456df1db7d The study of complex adaptive systems, a subset of nonlinear dynamical systems, is an interdisciplinary matter that attempts to blend insights from the natural and social sciences to develop system-level models and insights that allow for heterogeneous agents, phase transition, and emergent behavior. CAS is increasingly applied to analyze political-economic development and institutional change, where outcomes emerge from interactions among adaptive agents, and may be influenced but not precisely controlled. 456df1db7d] 456df1db7d Following the album's announcement, through a press release, Stormzy revealed that the album was recorded on Osea Island in England during a series of music camps with... 456df1db7d

Complex adaptive system It is a "complex macroscopic collection" of relatively "similar and partially connected micro-structures" formed in order to adapt to the changing environment and increase their survivability as a macro-structure. The Complex Adaptive Systems approach builds on replicator dynamics. As such, complex adaptive system is more similar to Richard Dawkins's idea of replicators. What distinguishes a complex adaptive system (CAS) A complex adaptive system (CAS) is a system that is complex in that it is a dynamic network of interactions, but the behavior of the ensemble may not be predictable according to the behavior of the components. It is adaptive in that the individual and collective behavior mutate and self-organize corresponding to the change-initiating micro-event or collection of events. unbiological 456df1db7d

Mean time between failures For complex, repairable systems, failures are considered to be those Mean time between failures (MTBF) is the predicted elapsed time between inherent failures of a mechanical or electronic system during normal system operation. MTBF can be calculated as the arithmetic mean (average) time between failures of a system. The term is used for repairable systems while mean time to failure (MTTF) denotes the expected time to failure for a non-repairable system. The definition of MTBF depends on the definition of what is considered a failure 456df1db7d

== Overview == 456df1db7d Following the release of the EDM track "Where Are Ü Now" (2015), where Bieber collaborated with Skrillex and Diplo for their project Jack Ü and achieving worldwide success and acclaim with it, the singer... 456df1db7d The definition of MTBF depends on the definition of what is considered a failure. For complex, repairable systems, failures are considered to be those out of design conditions which place the system out of service and into a state for repair. Failures which occur that can be left or maintained in an unrepaired condition, and do not place the system out of service, are not considered failures under this definition. In addition, units that are taken down for routine scheduled maintenance or inventory control are not considered within the definition of failure. The higher the MTBF, the longer a system is likely to work before failing. 456df1db7d Written and produced by Swift and Jack Antonoff, "Look What You Made Me Do" has an electronic production combining electropop, dance-pop, progressive pop, and synth-punk with elements of hip-hop, electroclash, industrial, and electro. It contains an interpolation of "I'm Too Sexy" (1991) by the English pop group Right Said Fred, whose members received songwriting credits as a result. The melody incorporates strings, plinking piano, and synthesizers, and the chorus consists of drumbeats and rhythmic chants. The lyrics are about the narrator's contempt for somebody who had wronged them. Many media publications interpreted the track to be a reference to the controversies that Swift faced, including the Kanye West feud. 456df1db7d
