Steps: 6933849236 Situation as of 01:02, 15 January 2015 (UTC) 6933849236 I (User:MattKingston) am in the process of creating a list of drugs and their various names. The list will be alphabetical and will use the following format (subject to change if better suggestions are put forward). 6933849236 Codes for veterinary use (ATCvet codes) can be created by placing the letter Q in front of the human ATC code: for example, QB03. ATCvet codes without corresponding human ATC codes are cited with the leading Q in the following list.National versions of the ATC classification may include additional codes not present in this list, which follows the WHO version. 6933849236 == B03A Iron preparations == 6933849236 Special:WhatLinksHere for the template 6933849236 == Purposes == 6933849236 All items in the list will follow the general format: 6933849236 cat:WP:Chemistry articles by quality (deep 2); set list from talkpage to subject page 6933849236 Name of drug (who calls it that) [country]. Redirects to name of drug. 6933849236 Format into wikipage off-line (spreadsheet) 6933849236 Produced three (dis)join list using database (access) 6933849236 Using AWB 6933849236

ATC code B03 Subgroup B03 is part of the anatomical group B Blood and blood forming organs. group B03AD01 Ferrous amino acid complex and folic acid B03AD02 Ferrous fumarate and folic acid B03AD03 Ferrous sulfate and folic acid B03AD04 Ferric ATC code B03 Antianemic preparations is a therapeutic subgroup of the Anatomical Therapeutic Chemical Classification System, a system of alphanumeric codes developed by the World Health Organization (WHO) for the classification of drugs and other medical products 6933849236

Mainspace (articles) only: 6933849236 Additives are used for many purposes but the main uses are: 6933849236
