== A == 8397c2cef6 A supplementary protection certificate comes into force only after the corresponding general patent expires. It normally has a maximum lifetime of 5 years. The duration of the SPC can, however, be extended to 5.5 years when the SPC relates to a human medicinal product for which data from clinical trials conducted in accordance with an agreed Paediatric Investigation Plan (PIP) have been submitted (as set out in Article 36 of Regulation (EC) No 1901/2006... 8397c2cef6 If the party examining the certificate trusts the issuer and finds the signature to be a valid signature of that issuer, then it can use the included public key to interact securely with the certificate's subject. In email encryption, code signing, and e-signature systems, a certificate's subject is typically a person or organization. However, in Transport Layer Security (TLS) a certificate's subject is typically a computer or other device, though TLS certificates may identify organizations or individuals in addition to their core role in identifying devices. TLS, sometimes called by its older name Secure Sockets Layer (SSL), is notable for being a part of HTTPS, a protocol for securely browsing the web. 8397c2cef6
