towards animation, literature, video games, and other forms of popular culture. Generative AI pornography, is pornographic content that is produced uses generative AI technology. Such material may be original characters, or real people through deepfakes. The content may depict softcore pornography, including lascivious behavior, or more explicit material depicting sexual intercourse and erotic art cc25057d5d

AI governance is a term used in policy, industry, and academic contexts to describe how AI systems are directed and overseen. A 2025 systematic literature review defined it as encompassing the questions of who is accountable for AI systems, what elements are governed, when governance occurs within the development lifecycle, and how it is implemented through frameworks, tools, or models. Charlotte Stix noted that related terms, including "trustworthy AI... cc25057d5d

AI takeover This could occur through economic manipulation, infrastructure control, or direct intervention, leading to de facto governance. Scenarios range from gradual economic dominance, as automation supplants the human workforce, up to a sudden or aggressive global takeover by a robot uprising or other forms of rogue AI. An AI takeover is a theorized future event, often depicted in fiction, in which autonomous artificial intelligence (AI) systems acquire the capability An AI takeover is a theorized future event, often depicted

cc25057d5d The field of digital rhetoric is not yet fully established. It draws theory and practices from the tradition of rhetoric as both an analytical tool and a production guide. As a whole, it can be categorized as a meta-discipline. cc25057d5d

Digital marketing Digital marketing effectively began in 1990 when the Archie search engine was created as an index Digital marketing is a component of marketing that uses digital technologies such as desktop computers, mobile phones, and other digital media platforms to promote products and services. differentiates digital marketing from online marketing cc25057d5d

Due to evolving study, digital rhetoric has held various meanings to different scholars over time. It can take on a variety of meanings based on what is being analyzed, depending on the concept, forms or objects of study, or rhetorical approach. Digital rhetoric can also be analyzed through the lenses of different social movements.
cc25057d5d AI slop has been variously defined as "digital clutter", "filler content prioritizing speed and quantity over substance and quality", and "shoddy or unwanted AI content in social media, art, books [and] search results". Jonathan Gilmore, a philosophy professor at the City University of New York, describes the material as having an "incredibly banal, realistic style" that is easy for the viewer to process. The effect of increasing AI slop on the web has been likened to the increase in entropy as driven

by the Second Law of Thermodynamics. cc25057d5d
Digital literacy is related to, but different from, other forms of literacy. Information literacy focuses on the ability to locate, evaluate, and utilize information through numerous formats. Media literacy refers to the ability to analyze and interpret media messages and their influence. In contrast, digital literacy integrates these competencies while also including the practical use of digital tools, participation in online environments, and the creation of digital content. This broader scope highlights the interactive and participatory...

Kingdom. cc25057d5d It has significantly transformed how brands and businesses use technology for marketing since the 1990s and 2000s. As digital platforms became increasingly incorporated into marketing plans and everyday life, and as people increasingly used digital devices instead of visiting physical shops, digital marketing campaigns have become increasingly prevalent, employing combinations of methods. These methods include search engine optimization (SEO), search engine marketing (SEM), content marketing, influencer marketing, content automation, campaign marketing, data-driven marketing, e-commerce marketing, social media marketing, social media optimization, e-mail direct marketing, display advertising, e-books, optical disks and games. Digital marketing also extends to non-Internet channels that provide digital media, such as television, mobile phones (SMS and MMS), callbacks, and on-hold mobile ringtones. cc25057d5d == History... == cc25057d5d

AI slop It is a form of synthetic media usually linked to the monetization in the creator economy of social media and online advertising. Coined in the 2020s, the term has a pejorative connotation similar to spam. "Slop" was selected as the 2025 Word of the Year by both Merriam-Webster and the American Dialect Society. AI slop, also known as slop content or simply slop, is digital content made with generative artificial intelligence that is perceived as lacking in effort AI slop, also known as slop content or simply slop, is digital content made with
