26a5832877 The original code for Android SMS messaging was released in 2009 integrated into the operating system. It was released as a standalone application independent of Android with the release of Android 5.0 Lollipop in 2014, replacing Google Hangouts as the default SMS app on Google's Nexus line of phones.

26a5832877 While Apple touts the role of the App Store in creating new jobs in the "app economy" and as of 2023 claims to have paid over \$320 billion to developers, the App Store has also attracted criticism from developers and government regulators that it operates a monopoly and that Apple's 30% cut of revenues from the store is excessive. In October 2021, the Netherlands Authority

for Consumers and Markets (ACM) concluded that in-app commissions from Apple's App Store are anti... 26a5832877

Google Play Services In June 2025, Google announced through Android Studio that Instant Apps support Google Play Services is a proprietary software package produced by Google for installation on Android devices. When it was introduced in 2012, it provided access to the Google+ APIs and OAuth 2. It consists of background services and libraries for use by mobile apps running on the device. having to install them from the Play Store. It expanded to cover a variety of Google services, allowing applications to communicate with the services through common means. The feature debuted in 2017 26a5832877

App store Apps provide a specific set of functions which, by definition, do not include the running of the computer itself. An app store, also called an app marketplace or app catalog, is a type of digital distribution platform for computer software called applications, often An app store, also called an app marketplace or app catalog, is a type of digital distribution platform for computer software called

applications, often in a mobile context. Today apps are normally designed to run on a specific mobile operating system—such as the contemporary iOS, iPadOS, Windows Phone, or Android—but in the past mobile carriers had their own portals for apps and related media content. Complex software developed for personal computers may have a corresponding mobile app optimized for the device's constraints 26a5832877

The App Store opened on July 10, 2008, with an initial 500 applications available. The number of apps peaked at around 2.2 million in 2017, but declined slightly over the next few years as Apple began a process to remove old or 32-bit apps. As of 2024, the store features more than 1.9 million apps. 26a5832877

App store optimization Apps are more visible when they rank highly on a wide variety of search terms (keyword optimization), maintain a high position in the top charts, or get featured on the store. mobile apps are the App Store (iOS) and Google Play (Android). Additionally, app store optimization encompasses activities that aim to increase the conversion of app

impressions into downloads (conversion rate optimization). Other alternatives for downloading apps include the Huawei App Gallery, Amazon App Store and App store optimization (ASO) is the process of increasing an app or game's visibility in an app store, with the objective of increasing organic app downloads 26a5832877

== Basic concept == 26a5832877 On July 10, 2008, Apple's App Store was launched along with the release of the iPhone 3G. It offered users the possibility to download over 500 native applications for free. Since then, the popularity of the App Store has risen immensely, counting around 1.82 million apps available in the store in 2020. A variety of Apple devices currently offer store use, including the iPhone, iPad, Mac, Apple TV, and Apple Watch. 26a5832877 == References == 26a5832877

List of Android app stores The Google Play Store (originally The functionality of mobile devices running the Android operating system, the most used mobile operating system globally, can be extended using "apps" - specialized software designed to offer users the means to use their devices for specific additional purposes. Such apps

are compiled in the Android-native APK file format which allows easy redistribution of apps to end-users. Alternative app stores use Android devices' "Unknown Sources" option to install APK files directly via the Android Package Manager 26a5832877

Google's official universal messaging platform for the Android ecosystem, Messages employs SMS, MMS, and Rich Communication Services (RCS). Starting in 2023, Google has RCS activated by default on participating Android devices, similar to the implementation of iMessage on Apple devices. Samsung Messages was discontinued on July 6, 2026, for the US market, with Samsung transitioning users to Google Messages as the default messaging application. 26a5832877

App Store (Apple) Apps can be downloaded on the iPhone, iPod Touch, or iPad, and some can be transferred to the Apple Watch smartwatch or 4th-generation or newer Apple TVs as extensions of iPhone apps. The App Store is an app marketplace developed and maintained by Apple, for mobile apps and desktop apps on its iOS, macOS and iPadOS operating systems The

App Store is an app marketplace developed and maintained by Apple, for mobile apps and desktop apps on its iOS, macOS and iPadOS operating systems. The store allows users to browse and download approved apps developed within Apple's iOS SDK

Google Messages It is also available as a web app. In July 2024, Samsung announced it would no longer pre-install Samsung Messages on its Galaxy Google Messages (formerly known as Messenger, Android Messages, and Messages by Google) is a text messaging software application developed by Google for its Android and Wear OS mobile operating systems. several new features, the app was renamed "Google Messages"

These lists are of the apps in Google Play that are free, and have at least 500 million downloads on unique Android == Google Play Store == History == The package's services include location tracking and geofencing, single sign-on account services, user health and fitness tracking, payment processing, integrated

advertising, and security scanning. Many apps on Android devices depend on the use of Google Play Services, and the package requires the user to use a Google Account and agree to Google's terms of service. Distributing Google Play Services on an Android device requires a license from Google, which contractually prohibits device producers from producing Android devices that are incompatible with Google's Android specifications. 26a5832877 Google Play Services is used by almost all Google apps that have system-level powers. Without Google Play Services, these apps may not work properly. 26a5832877 Most apps are distributed through Google's Play Store but many alternative software repositories, or app stores, exist. Alternative app stores use Android devices' "Unknown Sources" option to install APK files directly via the Android Package Manager. 26a5832877

List of most-downloaded Google Play applications The 500-million download threshold for free applications has been established, as of 2024, to maintain the list's manageability and torch on the most widely distributed apps. This list of most-downloaded Google Play Store applications

includes most of the free apps that have been downloaded at least 500 million times. As of 2024, thousands of Android applications have surpassed the one-million download milestone, with a significant subset reaching even higher thresholds. As of This list of most-downloaded Google Play Store applications includes most of the free apps that have been downloaded at least 500 million times. For context, in July 2017 319 apps had been downloaded at least 100 million times, and 4,098 apps had been downloaded at least ten million times. It's worth noting that many of the applications in this list are distributed pre-installed on top-selling Android devices and may be considered bloatware by some people because users did not actively choose to download them. The table below shows the number of Google Play apps in each category 26a5832877

devices: 26a5832877 == Services == 26a5832877 An app store can be thought as a restricted, commercial version of a package manager, although an app store provides additional services like app discovery, user reviews, security screening, licensing enforcement, and seamless integration of a payment system. Unlike

traditional package managers, which prioritize dependency management and system integration, app stores focus on usability, monetization, and a curated user experience. 26a5832877 An app store is any digital storefront intended to allow search and review of software titles or other... 26a5832877 Google Play Game Services... 26a5832877 == History == 26a5832877

List of Android apps by Google list of mobile apps developed by Google for its Android operating system. All of these apps are available for free from the Google Play Store, although some may be incompatible with certain devices (even though they may still function from an APK file) and some apps are only available on Pixel and/or Nexus devices. All of these apps are available for free from the Google Play Store, although some This is a list of mobile apps developed by Google for its Android operating system. A few, such as Gboard, are not supported on older versions of Android. Some of these apps may be pre-installed on some devices, depending upon the device manufacturer and the version of Android 26a5832877
