A Young Girl Reading strong contrast to the dark background and help the viewer home in on the curves and contours of the female form. Texture is created through Fragonard's

Lines are marks moving in a space between two points whereby a viewer can visualize the stroke movement, direction, and intention based on how the line is oriented. Lines describe an outline, capable of producing texture according to their length and curve. There are different types of lines artists may use, including, actual, implied, vertical, horizontal, diagonal and contour lines, which all have different functions. Lines are also situational elements, requiring the viewer to have knowledge of the physical world in order to understand their flexibility, rigidity, synthetic nature, or life.
