Hay can be used as animal fodder when or where there is not enough pasture or rangeland on which to graze an animal, when grazing is not feasible due to weather (such as during the winter), or when lush pasture by itself would be too rich for the health of the animal. It is also fed when an animal cannot access any pastures—for example, when the animal is being kept in a stable or barn. The roll is an important technique for paddlers on serious whitewater, as exiting the boat and swimming leaves the swimmer more exposed than remaining in the boat.

The sugar beet has a conical, white, fleshy root (a taproot) with a flat crown. The plant consists of the root and a rosette of leaves. Sugar is formed by photosynthesis in the leaves and is then stored in the root. Common side effects include vomiting, diarrhea, muscle pain, headache, and rash. Severe side effects may include fluid retention, gastrointestinal bleeding, bone marrow suppression, liver problems, and heart failure. Use during pregnancy may result in harm to the baby. Sugar beets are grown in climates that are too cold for sugarcane. In 2024, Russia and Germany were the two largest sugar beet producers contributing to a world total of 294 million tonnes. Sugarcane accounts for most of the rest of sugar produced globally. The root of the beet contains 75% water, about 20% sugar, and 5% pulp. The exact sugar content can vary between 12% and 21%, depending on the cultivar and growing conditions. Sugar is the primary value of sugar beet as a cash crop. The pulp, insoluble... == Description ==

Ketogenic diet stunted growth, bone fractures, and kidney stones. The ketogenic diet is a high-fat, adequate-protein, low-carbohydrate dietary therapy that in conventional medicine is used mainly to treat hard-to-control (refractory) epilepsy in children. The diet reduces levels of insulin-like growth factor 1, which is important for childhood growth. The diet forces the body to burn fats rather than carbohydrates

== Overview == 88214b9bfc == History == 88214b9bfc == Early history == 88214b9bfc Hay production and harvest, commonly known as "making hay", "haymaking", "haying" or "doing hay", involves a multiple-step process: cutting, drying or "curing", raking, processing, and storing. Hayfields do not have to be reseeded each year in the way that grain crops are, but regular fertilizing is usually desirable, and overseeding a field every few years helps increase yield. 88214b9bfc Women's wrestling at the U.S. college level uses two different rulesets. The National Wrestling Coaches Association, whose women's division is now recognized by the NCAA as part of its Emerging Sports for Women program, uses the freestyle ruleset as defined by the sport's international governing body, United World Wrestling. The National Collegiate Wrestling Association, a separate governing body that conducts competition for colleges and universities parallel to but outside the scope of the NCAA, uses collegiate rules in its women's division... 88214b9bfc

Carbohydrates in food are converted into glucose, which is then transported around the body and is important in fueling brain function. However, if only a little carbohydrate remains in the diet, the liver converts fat into fatty acids and ketone bodies, the latter passing into the brain and replacing glucose as an energy source. An elevated level of ketone bodies in the blood (a state called ketosis) eventually lowers the frequency of epileptic seizures. Around half of children and young people with epilepsy who have tried some form of this diet saw the number of seizures drop by at least half, and the effect persists after discontinuing the diet. Some evidence shows that adults with epilepsy may benefit from the diet and that a less strict regimen, such as a modified Atkins diet, is similarly effective. Side effects may include constipation, high cholesterol, growth slowing, acidosis, and kidney stones. 88214b9bfc The original therapeutic diet... 88214b9bfc == Composition == 88214b9bfc Imatinib was approved for medical use in the United States in 2001. Man-carrying kites were used in ancient China for both civil and military purposes, and sometimes used as a punishment. The Book of Sui, dating from 636 AD, records that the tyrant Gao Yang, Emperor Wenxuan of Northern Qi (r. 550–559), executed prisoners by ordering them to 'fly' using bamboo mats. The (1044) Zizhi Tongjian records that in 559, all the condemned kite airmen died except for Eastern Wei prince Yuan Huangtou.
