He said, "I guess I've been mistreating myself. In the course of feeding 'Zico,' I found out that human 'Woo Ji-ho' [Zico's real name] was worn out, unaware of how to live, how to feel when left alone. Some psychologists believe that positive thinking is able to positively influence behavior and so bring about better results. This is called the "Pygmalion effect". Studies have consistently shown that holding all else equal, subjects will have unrealistic optimism and predict positive outcomes to be more likely than negative outcomes.
