Progesterone (medication) Faundes A, Brache V, Alvarez F (2004). A progesterone vaginal ring and progesterone intrauterine device used for birth control also exist in some areas of the world. Retrieved 7 July 2010. Progesterone can be taken by mouth, vaginally, and by injection into muscle or fat, among other routes. American Journal Progesterone (P4), sold under the brand name Prometrium among others, is a medication and naturally occurring steroid hormone. It is also used in women to support pregnancy and fertility and to treat gynecological disorders. It is a progestogen and is used in combination with estrogens mainly in hormone therapy for menopausal symptoms, and low sex hormone levels in women, as well as gender affirming therapy in transgender women. 2011. Honduras Its capital and largest city is Tegucigalpa. birth control, and IUDs. A study done in 2001 reflects

conceptualization of reproductive health and decision making in Honduras; 28% of men and 25% of women Honduras, officially the Republic of Honduras, is a country in Central America. It is bordered to the west by Guatemala, to the southwest by El Salvador, to the southeast by Nicaragua, to the south by the Pacific Ocean at the Gulf of Fonseca, and to the north by the Gulf of Honduras, a large inlet of the Caribbean Sea 6972feb74c

ACE inhibitor 6972feb74c 100K Genome Project 6972feb74c Honduras was home to several important Mesoamerican cultures, most notably the Maya, before Spanish colonization in the 16th century. The Spanish introduced Catholicism and the Spanish language, along with numerous customs that have blended with the indigenous culture. Honduras became independent in 1821 and has since been a republic, although it has consistently endured much social strife and political instability, and remains one of the poorest countries in the Western Hemisphere. In 1960, the northern part of what was the Mosquito Coast was transferred from Nicaragua to Honduras by the International Court of Justice. 6972feb74c See also Wikipedia:WikiProject Short descriptions/wd/drugs-autodesc for items with no description. Emergency contraception in Spain 09%, while levonorgestrel had a failure rate of between 1. and the copper IUD. The copper IUD had the lowest failure rate at 0. These include the morning-after pill and levonorgestrel. 1% taken between 72 and Emergency contraception in Spain refers to the contraceptive methods used in Spain that prevent a fertilized egg from implanting in the uterus. The situation in Spain is unique due to

its history of access to contraception in general, the legislative timeline that legalized emergency contraception and under what conditions it could be dispensed, the impact of conscientious objection by doctors and pharmacists, cases in the Spanish judiciary related to conscientious objection, the relatively high cost compared to other countries in Europe and North America, the linkage of emergency contraception with efforts to reduce abortions by both left-wing and right-wing political parties, the impact of the COVID-19 pandemic on the distribution of emergency contraceptives, and usage statistics

2022-12-29 via PetScan 11 α -Hydroxyprogesterone 17 β -Dihydroequilin Progesterone is a naturally occurring and bioidentical progestogen, or an agonist of the progesterone receptor, the biological target of progestogens like endogenous progesterone. Progesterone also has antimineralocorticoid and inhibitory neurosteroid activity, whereas it appears to have little or no glucocorticoid or antiandrogenic activity and has no androgenic activity. Because of its progestogenic activity, progesterone has functional antiestrogenic effects in certain tissues such as the uterus, cervix, and vagina. In addition, progesterone has antigonadotropic effects due to its progestogenic activity and can inhibit fertility and suppress sex hormone production. Progesterone differs from progestins (synthetic progestogens) like medroxyprogesterone acetate and norethisterone, with implications for pharmacodynamics and pharmacokinetics as well as efficacy, tolerability, and safety. == Articles == 1998 United States listeriosis outbreak 1863–75 cholera pandemic 2009 flu pandemic in Brazil 10/90 gap
