Statistical classification Often, the individual observations are When classification is performed by a computer, statistical methods are normally used to develop the algorithm. When classification is performed by a computer, statistical methods are normally used to develop the algorithm

== Sport == People in this class compete in wheelchair racing events.

T40 (classification) Jane Buckley, writing for the Sporting Wheelies, describes the athletes in this classification as: "Dwarf T40 is disability sport classification for disability athletics, specifically athletes of short stature. This classification is for disability athletics. Male athletes under 130 cm (4 ft 3+1/4 in) and female athletes under 125 cm (4 ft 1+1/4 in) can compete in this category

World Triathlon has implemented some modifications to the classification system that was introduced in 2014 after further research was conducted to address certain aspects of the previous system. The research project is an ongoing project for both physical and vision impairments.

T41 (classification) This is a classification for athletes with short stature. The T41 and F41 classification is for disability athletics. It is used in track athlete and has a sister classification F41 for field athletes. is a classification for athletes with short stature. T41 do not currently challenge for any T41 is disability sport classification for disability athletics

Douro quinta classification While other wine classification systems may classify the winery (such as the 1855 Bordeaux classification), the Douro quinta classification is based upon the physical characteristics of the vineyard. Quintas with a higher classification (and theoretically capable of producing grapes of higher quality) are permitted to harvest more grapes than a vineyard that received a lower classification. In Portuguese, a quinta is a wine producing estate, which can be a winery or a vineyard. The Quinta classification of Port vineyards in the Douro is a system that grades the terroir and quality potential of vineyards in the Douro wine region The Quinta classification of Port vineyards in the Douro is a system that grades the terroir and quality potential of vineyards in the Douro wine region to produce grapes suitable for the production of Port wine. The

classification system is run by the Instituto dos Vinhos do Douro e Porto (IVDP) and shares some similarities to the classification of Champagne vineyards in that one of the purposes of the system is to ensure that vineyards producing grapes with the highest quality potential receive a high price. A secondary function of the quinta classification is the establishment of permitted yields for production 6fb8cf2cfc

Classification of the Indigenous languages of the Americas The article This is a list of different language classification proposals developed for the Indigenous languages of the Americas or Amerindian languages. This is a list of different language classification proposals developed for the Indigenous languages of the Americas or Amerindian languages. The article is divided into North, Central, and South America sections; however, the classifications do not correspond to these divisions 6fb8cf2cfc

Wetland classification There is no commonly accepted definition of what constitutes a wetland. In the 1970s, the Ramsar Convention on Wetlands of International Importance introduced a first attempt to establish an internationally acceptable wetland classification scheme. A number of national wetland classifications exist. A number of national wetland classifications exist. In the 1970s, the Ramsar Convention There is no commonly accepted definition of what constitutes a wetland 6fb8cf2cfc

The wines were ranked in importance from first to fifth growths (crus). All of the red wines that made it on the list came from the Médoc region except for one: Château Haut-Brion from Graves. The white wines, then of much less importance than red wine, were limited to the sweet varieties of Sauternes and Barsac and were ranked only from superior first growth to second growth. 6fb8cf2cfc Often, the individual observations are analyzed into a set of quantifiable properties, known variously as explanatory variables or features. These properties may variously be categorical (e.g. "A", "B", "AB" or "O", for blood type), ordinal (e.g. "large", "medium" or "small"), integer-valued (e.g. the number of occurrences of a particular word in an email) or real-valued (e.g. a measurement of blood pressure). Other classifiers work by comparing observations to previous observations by means of a similarity or distance function. 6fb8cf2cfc == Definition == 6fb8cf2cfc An algorithm that implements classification, especially in a concrete implementation, is known as a classifier. The term "classifier" sometimes also refers to the mathematical function, implemented by a classification algorithm, that maps input data to a category. 6fb8cf2cfc

Terminology across fields is quite varied. In statistics, where classification is often done with logistic regression or a similar procedure, the properties of observations are termed explanatory variables (or independent variables, regressors, etc.), and the categories to be predicted... 6fb8cf2cfc

T51 (classification) It is for sportspeople with minimal upper body function who use a wheelchair, spinal cord injury class F1 and Les Autres class LAF1. Similar classifications are T52, T53, T54 and T55. T51 is disability sport classification for athletics. The class includes people with a number of different types of disabilities including spinal cord T51 is disability sport classification for athletics. The class includes people with a number of different types of disabilities including spinal cord injuries and cerebral palsy 6fb8cf2cfc

Bordeaux Wine Official Classification of 1855 requested a classification system for France's best Bordeaux wines that were to be on display for visitors from around the world. Brokers from the wine industry ranked the wines according to a château's reputation and trading price. Brokers from the wine industry The Bordeaux Wine Official Classification of 1855 resulted from the 1855 Exposition Universelle de Paris, when Emperor Napoleon III requested a classification system for France's best Bordeaux wines that were to be on display for visitors from around the world 6fb8cf2cfc
