

Keg Meaning In Bengali

== A == 80f9907add Like many North American languages, Ojibwe is polysynthetic, meaning it exhibits a great deal of synthesis and a very high morpheme-to-word ratio (e.g., the single word for "they are Chinese" is aniibiishaabookewininiwiwag, which contains six morphemes: leaf-liquid-make-man-be-PLURAL, or approximately "they are leaf-drink [i.e., tea] makers"). It is agglutinating, and thus builds up words by stringing morpheme after morpheme together, rather than having several affixes which carry numerous different pieces of information. 80f9907add

A big list will constantly show you what words you don't know and what you need to work on and is useful for testing yourself. Eventually these words will all be translated into big lists in many different languages and using the words in phrase contexts as a resource. You can use the list to generate your own lists in whatever language you're learning and to test yourself 80f9907add
