The National Grassland consists of about 100 tracts of land interspaced with privately owned ranchland. It is located in the mixed grass prairie region. The terrain is characterized by sandy and red slate hills in addition to grassland and oak brush. The creek bottoms are wooded with cottonwood, elm, and hackberry. Wildlife includes white-tailed deer, turkey and quail. The Washita River flows through the grassland. It is a small stream here near its headwaters, only a few feet wide and shallow. The nearest town is Cheyenne where the grassland headquarters is located.
