Ledgard was born in the Shetland Islands, off the north coast of Scotland, in 1968. The story follows the exploits of an orphaned reticulated giraffe only known as Cecily Giraffe, or simply "Cecily G." for short. She is saddened by the loss of her fellow jungle animals and family, all of whom had been captured and placed in a zoo. Reception Examples Background

Unicycle Unicycles have also been used to create new sports

such as unicycle basketball and unicycle hockey. Unicycling is practiced professionally in circuses, by street performers, in festivals, and as a hobby. The most common variation has a frame with a saddle, and has a pedal-driven direct-drive. In recent years, unicycles have also been used in mountain unicycling, an activity similar to mountain biking or trials. A two speed hub is commercially available for faster unicycling. variations including: the seatless unicycle ("ultimate wheel"); the tall ("giraffe"); unicycle and "2-wheelers"; or "3-wheelers"; (multiple wheels stacked A unicycle (also monocycle) is a vehicle that touches the ground with only one wheel db11f8e526

The distinguishing characteristics of giraffes are their extremely long neck and legs, horn-like ossicones, and spotted coat patterns. Their scattered range

extends from Chad in the north to South Africa in the south and from Niger in the west to Somalia in the east. Giraffes usually inhabit savannahs and woodlands. Their food source is leaves, fruits, and flowers of woody plants, primarily acacia species, which they browse at heights most other ground-based herbivores cannot reach. Lions, leopards, spotted hyenas, and African wild dogs may prey upon giraffes. Giraffes live in herds of related females... db11f8e526 In another section of the jungle lived a female monkey named Mother Pamplemoose. She and her eight offspring were left homeless by the loss of all the trees in their forest due to woodcutters. It is here the character of Curious George is introduced, who declares that it is time for the family to pack their belongings and move on. db11f8e526

He was put into the attic to protect him from the children's rough play, and with the children being older now, the animals rescue him and bring him back down to the playroom. He becomes the most respected toy and guides the others in their many adventures. Splash, published in 2003, was the first book where the toys leave the house and garden. db11f8e526 Genetic research on giraffes in 2016 determined that there are likely four separate species of giraffe rather than just one. The IUCN's Giraffe and Okapi Specialist Group has now accepted that there are four species of giraffes: the Masai giraffe, the reticulated giraffe, the northern giraffe, and the southern

giraffe.[3] The Masai giraffe has therefore been elevated to a full species, the research also established that the Thornicroft's giraffe also known as the Luangwa giraffe, found in the Luangwa Valley region of Zambia, is a subspecies of the Masai giraffe (*Giraffa tippelskirchi thornicrofti*). db11f8e526

Giraffe 7-2 m (5 ft 7 in – 6 ft 7 in) tall. Traditionally, giraffes have been thought of as one species, *Giraffa camelopardalis*, with nine subspecies. A newborn giraffe is

1. umbilical cord. They are classified under the family Giraffidae, along with their closest extant relative, the okapi. Six valid extinct species of Giraffa are known from the fossil record. Most recently, researchers proposed dividing them into four extant species, with seven subspecies, which can be distinguished morphologically by their fur coat patterns. Within a few hours of birth, the calf can run around and is almost indistinguishable. Giraffes (genus Giraffa) are large African hoofed mammals. They are the tallest living terrestrial animals and the largest ruminants on Earth.
