A character in Rizzoli and Isles has the rank of "Sergeant Detective" in the Boston PD. I've never heard of this formulation before. Here in the UK a sergeant in the CID would be called a "Detective Sergeant". I've checked some other American police articles (LAPD, NYPD, SFPD, LVMPD), and either they don't have a separate detective rank structure at all, or they have detectives, but higher ranks revert to the plain "sergeant", "lieutenant" denomination. Cosby appealed on June 25, 2019, and the verdict was subsequently upheld and granted an appeal by the Pennsylvania Supreme Court. On June 30, 2021, the Pennsylvania Supreme Court found that an agreement with a previous prosecutor, Bruce Castor, prevented Cosby from being charged in the case, and overruled the conviction. The Supreme Court's decision prevents him from being tried on the same charges a third time. The Montgomery County district attorney's office filed

a certiorari petition asking the U.S. Supreme Court to hear the case, but on March 7, 2022, the petition was denied, making the decision of the state supreme court final. e60eff0ced I'm trying to find/remember an scientific article about a task/game where small children outperformed adults by far.
