

How To Control Vomiting During Pregnancy

Drugs in pregnancy Of those who bear children, recreational drug use can have serious consequences to the health of not only the mother, but also the fetus as many medications can cross the placenta and reach the fetus. Some of the consequences on the babies include physical and mental abnormalities, higher risk of stillbirth, neonatal abstinence syndrome (NAS), sudden infant death syndrome (SIDS), low birthweight, and others. In addition a reported 5–10% of women of childbearing age use alcohol or other addictive substances. Drugs, including medications and recreational drugs, may have effects during pregnancy on the pregnant woman and fetus that vary from the effects of the drug Drugs, including medications and recreational drugs, may have effects during pregnancy on the pregnant woman and fetus that vary from the effects of the drug on people who are not pregnant. The Food and Drug Administration (FDA) in the United States reports that there are six million pregnancies with at least 50% of the women taking at least one medication 81bade53c5

Physiological changes in pregnancy Physiological changes in pregnancy are the adaptations that take place during pregnancy that enable the accommodation of the developing embryo and fetus 81bade53c5

Complications of pregnancy Complications that occur primarily during childbirth are termed obstetric labor complications, and problems that occur primarily after childbirth are termed puerperal disorders. While some complications improve or are fully resolved after pregnancy, some may lead to lasting effects, morbidity, or in the most severe cases, maternal or fetal mortality. Complications of pregnancy are health problems that are related to or arise during pregnancy. Complications that occur primarily during childbirth are termed Complications of pregnancy are health problems that are related to or arise during pregnancy 81bade53c5

In 2016, complications of pregnancy, childbirth, and the puerperium resulted in 230,600 deaths globally, down from 377,000 deaths in 1990. The most... 81bade53c5

Vomiting The vomited contents are known as vomit or vomitus. The vomited contents are known as vomit or vomitus. Vomiting can be the result of ailments such as food poisoning, gastroenteritis, pregnancy, motion Vomiting (scientifically known as emesis, and otherwise known as puking, and throwing up) is the forceful expulsion of the contents of one's stomach through the mouth and sometimes the nose

81bade53c5

Common complications of pregnancy include anemia, gestational diabetes, infections, gestational hypertension, and pre-eclampsia. Presence of these types of complications can have implications on monitoring lab work, imaging, and medical management during pregnancy. 81bade53c5

Chemotherapy-induced nausea and vomiting Chemotherapy-induced nausea and vomiting (CINV) is a common side-effect of many cancer treatments. Nausea and vomiting are two of the most feared cancer 81bade53c5

Ectopic pregnancy Nausea, vomiting and diarrhea are more rare symptoms of ectopic pregnancy. lead to a misdiagnosis of miscarriage. Rupture of an ectopic pregnancy can lead 81bade53c5

Pregnancy Signs and symptoms of early pregnancy may include missed periods, tender breasts, morning sickness (nausea and vomiting), hunger, implantation bleeding Pregnancy is the time during which one or more offspring gestates inside a woman's uterus. A multiple pregnancy involves more than one offspring, such as with twins 81bade53c5

The root word for emetophobia is emesis, from the Greek word emein, which means "an act or instance of vomiting", with -phobia meaning "an exaggerated usually inexplicable fear of a particular object, class of objects, or situation." 81bade53c5

False pregnancy False pregnancy (or pseudocyesis, from Ancient Greek pseudes 'false' and kyesis 'pregnancy"') is the appearance of clinical or subclinical signs and symptoms 81bade53c5

Pyridoxine/doxylamine for nausea and vomiting of pregnancy (morning sickness); even though its efficacy has not been proven and subsequent research has led to the removal of 81bade53c5

Drugs taken in pregnancy including over-the counter-medications, prescription medications, nutritional supplements, recreational drugs, and illicit drugs may cause harm to the mother or the unborn child. Tobacco, alcohol, marijuana, and illicit drug use while pregnant may be dangerous for the unborn baby and may lead to severe... 81bade53c5 Signs and symptoms of early pregnancy may include missed periods, tender breasts, morning sickness (nausea and vomiting), hunger, implantation bleeding, and frequent urination. Pregnancy may be confirmed with a pregnancy test. Methods of contraception are used to avoid pregnancy. 81bade53c5 Vomiting can be the result of ailments such as food poisoning, gastroenteritis, pregnancy, motion sickness, or hangover; or it can be an after effect of diseases such as brain tumors, elevated intracranial pressure, or overexposure to ionizing radiation. The feeling that one is

about to vomit is called nausea; it often precedes, but does not always lead to vomiting. Impairment due to alcohol, anesthesia, or other sedatives can cause inhalation of vomit. In severe cases, where dehydration develops, intravenous fluid may be required. Antiemetics are sometimes necessary to suppress nausea and vomiting. Self-induced vomiting can be a component of an eating disorder such as bulimia nervosa, and is itself now classified as an eating disorder on its own, purging disorder. 81bade53c5

Emetophobia This specific phobia can also include subcategories of what causes the anxiety, including a fear of vomiting, being vomited on, or seeing Emetophobia is a phobia that causes overwhelming, intense anxiety pertaining to vomit. This specific phobia can also include subcategories of what causes the anxiety, including a fear of vomiting, being vomited on, or seeing others vomit. Emetophobes might also avoid the mentions of "barfing", vomiting, "throwing up", or "puking". pertaining to vomit 81bade53c5

It is common for those who suffer from emetophobia to be underweight or malnourished due to strict diets and restrictions they make for themselves. The thought of someone possibly vomiting can cause the phobic person to engage in extreme behaviors to escape from their anxiety triggers, e.g. going to great lengths to avoid situations that could be perceived as "threatening". 81bade53c5 Severe complications of pregnancy, childbirth, and the puerperium are present in 1.6% of mothers in the US, and in 1.5% of mothers in Canada. In the immediate postpartum period (puerperium), 87% to 94% of women report at least one health problem. Long-term health problems (persisting after six months postpartum) are reported by 31% of women. 81bade53c5 == Etymology == 81bade53c5 Emetophobia is clinically considered an "elusive predicament" because limited research has been done pertaining to it. The fear of vomiting receives little attention compared to other fears. 81bade53c5 Pregnancy is divided into three trimesters of approximately... 81bade53c5 Conception usually occurs following vaginal intercourse, but can also occur through assisted reproductive technology procedures. A pregnancy may end in a live birth, a miscarriage, an induced abortion, or a stillbirth. Childbirth typically occurs around 40 weeks from the start of the last menstrual period (LMP), a span known as the gestational age; this is just over nine months. Counting by fertilization age, the length is about 38 weeks. Implantation occurs on average 8–9 days after fertilization. An embryo is the term for the developing offspring during the first seven weeks following implantation (i.e. ten weeks' gestational age), after which the term fetus is used until the birth of a baby. 81bade53c5
